Thinking of Music Michael Eldred, 2015-07-08 Today's composers are preoccupied first and foremost with exploring the possibilities of producing new and hitherto unheard of kinds of different sounding music In particular they employ advanced mainly electronic technologies or invent new musical instruments that break the mould of traditional music making thus introducing new sounds to music On this front there are exciting creative developments for those willing to open their ears These contemporary composers also often take a piece of literature an art work a landscape or an historical event for extraneous orientation The traditional understanding of music especially of Western music based as

it is on harmony and wedded to aesthetic theory has long since been burst The beginning of the twentieth century heralded already a break out into the realm of sounds beyond those well defined pure rational tones produced by specially designed instruments The advent of electricity and electronics exploded conceptions of music tied to venerated traditions particularly in European music Do these new kinds of music come about simply because of advances in technology that composers and musicians licentiously and creatively appropriate for their own music making purposes Or does their thinking need to dig deeper philosophically to gain another orientation and attunement There is a dearth of philosophical thinking on music nowadays which invariably remains dedicated either to aesthetic theory or social critique or to a blend of both The present study offers an alternative approach to thinking on music along a path that leads from via to music and is parallel to the way from via to language

The Thought of Music Lawrence Kramer,2016-01-12 What exactly is knowledge of music And what does it tell us about humanistic knowledge in general The Thought of Music grapples directly with these fundamental questions questions especially compelling at a time when humanistic knowledge is enmeshed in debates about its character and future In this third volume in a trilogy on musical understanding that includes *Interpreting Music and Expression* and *Truth* Lawrence Kramer seeks answers in both thought about music and thought in music thinking in tones He skillfully assesses musical scholarship in the aftermath of critical musicology and musical hermeneutics and in view of more recent concerns with embodiment affect and performance This authoritative and timely work challenges the prevailing conceptions of every topic it addresses language context and culture pleasure and performance and through music the foundations of understanding in the humanities The publisher gratefully acknowledges the Joseph Kerman Endowment of the American Musicological Society funded in part by the National Endowment for the Humanities and the Andrew W Mellon Foundation

How to Think Music Harriet Ayer Seymour,2014-03-03 An excerpt from the Author s PREFACE IN music as in other things we have allowed ourselves to do a great deal of thoughtless and therefore useless work The object of this book is to arouse those who have only played music to think music before playing it The thought must always be prior to the fact The inward process of listening and hearing is not adequately expressed by the word think but it seems to be the best term descriptive of the process that the English language affords I do not presume for a moment to address myself to the trained musician to whom this side of the question has become second nature but rather to the lover of music who has played the piano or organ or any other musical instrument and who has never really heard inwardly or thought the music he has played Since so many persons of the latter class have enriched their lives already after the manner herein advocated the temptation to write this book has proved irresistible **Official Report of the ... Annual Meeting of the New York State Music Teachers' Association** New York State Music Teachers' Association,1909 **Church Music Review and Official Bulletin of the American Guild of Organists** ,1904 **Creativity and Music Education** Timothy Sullivan, Lee Willingham,2002-09-15 Seventeen contributors make a compelling case for including creativity as part of the music classroom from kindergarten to teacher training courses Practical solutions and time tested practices are provided *Hollis Dann Music Course* Hollis Dann,1912 How to Think Music Harriet Ayer Seymour,2015-05-18 Many people are educated in the theory and technique of music and yet remain in the truest sense unmusical Mrs Seymour s method awakens and

develops the inner musical intelligence without which the real musician is an impossibility Harvard Musical Review Volume 1
1912 The subject is presented in an unusually clear way and the reader is tempted to become a student of music the art is
made so apparently easy when the rules of first thinking it out are followed A book on the subject will be ready for delivery
about Sept 1st which all metaphysicians should welcome We have known Mrs Seymour for years and she understands what
she is writing about both as musician and metaphysician Unity Volume 32 1910
