Read the following passage and answer the questions that follow.

The International Conference on Population and Development (ICPD) met in 1994 to discuss ways to slow the growth of the world population before Earth's resources are no longer able to support its population. The goals of the ICPD are to stabilize population growth by helping countries to develop and by helping improve the status of women. By 2015, the ICPD hopes to achieve these goals by providing access to safe and reliable family-planning methods, reducing infant and maternal mortality rates, increasing life expectancy, and achieving universal access to primary education.

8. How does improving the status of women influence the fertility rate?

9. How does decreasing infant mortality rate affect population growth?

10. What are some ways that more access to primary education could be provided in less-developed regions of the world?
