Body Paragraph #2

It is clear that in the modern era the number of languages spoken on Earth is declining. There are various reasons for this and it could be seen as either a positive or negative development, depending upon your perspective. This essay will suggest that there are good arguments for both views.

Those who think that the trend is a negative one point inevitably to the loss of cultural identity and a rising trend for linguistic hegemony that have swept the globe in the past century. Prior to this, the world was a diverse place, filled with disparate cultures that were entirely alien to one another. The variety made our species interesting and beautiful, but now, thanks to colonisation and globalisation, these differences are being lost and people are losing what made them unique. Instead, people talk the same language and about the same cultural influences.

However, this could be seen on a relatively positive trend, too. In the modern era there are fewer wars and far more dialogue between nations. People from all over the world can communicate either using a few popular languages and this could be said to bring our planet together. When people speak thousands of different languages, it is hard for them to communicate but now it is possible for people to find a common language and communicate with it. This has fostered living relationships as well as business and cultural advancement, and it has made it possible for people to attain levels of education that were previously inaccessible.

In conclusion, there are strong arguments supporting both views. It is definitely a positive thing to have some common languages but it cannot be denied that there are great losses entailed, too.

This collection is a comprehensive resource on conducting research in applied linguistics involving written genres that is distinctive in its coverage of a multiplicity of interdisciplinary perspectives. The volume explores the central approaches, methodologies, analyses, and tools used in conducting genre-based research, extending the traditional focus on a single framework for defining genres by explicating the major approaches that have been invoked in applied linguistics. Chapters address a mix of commonly used methodologies, e.g., case studies, ethnographic approaches, types of analyses, e.g., metadiscourse, rhetorical move, step analysis, multidimensional analysis, lexical bundles, and phrase frames. CALF measures multimodal analysis and studies that focus on other areas of second language (L2) teaching and learning, e.g., multilingualism, the Teaching and Learning Cycle. Taken together, the volume provides a theoretically and methodologically diverse introduction to foundational topics in genre-related research, supported by detailed discussions of the challenges and practical considerations to take into account when conducting research involving written genres. This book is a valuable resource for graduate students, faculty, and researchers in applied linguistics, particularly those working in second language acquisition, L2 writing, and genre theory and pedagogy.
