Anne Xie, Xiong Huang, 2012-01-25 CSE2011 is an integrated conference concentrating its focus on computer science and education. In the proceeding you can learn much more knowledge about computer science and education of researchers from all around the world. The main role of the proceeding is to be used as an exchange pillar for researchers who are working in the mentioned fields. In order to meet the high quality of Springer AISC series, the organization committee has made their efforts to do the following things: Firstly, poor quality papers have been refused after reviewing courses by anonymous referees and experts. Secondly, periodic review meetings have been held around the reviewers about five times for exchanging reviewing suggestions. Finally, the conference organizers had several preliminary sessions before the conference. Through the efforts of different people and departments, the conference will be successful and fruitful. *Web Data Mining and the Development of Knowledge-Based Decision Support Systems*

Sreedhar, G., 2016-12-21 Websites are a central part of today's business world; however, with the vast amount of information that constantly changes and the frequency of required updates, this can come at a high cost to modern businesses. *Web Data Mining and the Development of Knowledge Based Decision Support Systems* is a key reference source on decision support systems in view of end-user accessibility and identifies methods for extraction and analysis of useful information from web documents. Featuring extensive coverage across a range of relevant perspectives and topics such as semantic web, machine learning, and expert systems, this book is ideally designed for web developers, internet users, online application developers, researchers, and faculty. **Universal Meta Data Models**

David Marco, Michael Jennings, 2004-03-11 The heart of the book provides the complete set of models that will support most of an organization's core business functions, including universal meta models for enterprise-wide systems, business meta data, and data stewardship, portfolio management, business rules, and XML messaging and transactions. Developers can directly

adapt these models to their own businesses saving countless hours of development time Building effective meta data repositories is complicated and time consuming and few IT departments have the necessary expertise to do it right which is why this book is sure to find a ready audience Begins with a quick overview of the Meta Data Repository Environment and the business uses of meta data then goes on to describe the technical architecture followed by the detailed models
