**Green Building** RSMears, 2010-11-11 A unique cost reference updated and expanded for architects engineers contractors building owners and managers Green building is no longer a trend Since the publication of the widely read first edition of this book green building has become a major advancement in design and construction Building codes and standards have adopted much stricter energy efficiencies Businesses institutions and communities have discovered huge savings along with health and marketing advantages in

sustainable building Private facilities as well as public buildings for Federal state and local governments are increasingly required to design and build sustainably in both new construction and renovation This Third Edition has been updated with the latest in green building technologies design concepts standards and costs The chapters case studies and resources give you practical guidance on green building including the latest on Green building approaches materials rating systems standards and guidelines Energy efficiencies implementing energy modeling tools Designing and specifying as well as commissioning green building projects Often specified products and materials as well as a sample spec Goals and techniques for health comfort and productivity Evaluating the cost versus value of green products over their life cycle Low cost green strategies and special economic incentives and funding Building deconstruction and cost considerations With a new chapter on greening of commercial real estate this reference is a one stop resource for the latest in green building approaches and implementation The contributors all prominent leaders in green building include Mark Kalin FAIA FCSI author of the original GreenSpec Andy Walker Ph D PE senior engineer with NREL Joseph Macaluso AACE certified cost consultant Building Performance Evaluation Wolfgang F.E. Preiser, Andrea E. Hardy, Ulrich Schramm, 2017-08-30 The main aim of this book is to present an intriguing retrospective of Building Performance Evaluation BPE as it evolved from Post Occupancy Evaluation POE over the past 25 years On one hand this is done by updating original authors chapter content of Building Evaluation the first edition published in 1989 That in turn is augmented by an orientation toward current and future practice on the other including new authors who are engaged in ongoing cutting edge projects Therefore individual methodology oriented chapters covering the fundamental principles of POE and BPE go along with major thematic chapters topics of which like sustainability or integration of new technologies are addressed in a diversity of case studies from around the globe Research methodologies and framework of POEs continue to evolve POEs are one step on the larger scale of BPE in understanding how buildings function after they are occupied This resource helps architects building owners and facility managers understand the implications and reactions to the facilities that they designed built and or commissioned By considering the whole process from conception to future uses of the building there can be a more holistic approach to the planning programming design construction occupancy and future adaptability of the structure This book is dedicated to first editor Wolfgang F E Preiser who passed away during the process of editing and reviewing chapters of this volume **Chinese Urban Planning and Construction** Lanchun Bian, Yan Tang, Zhenjiang Shen, 2021-05-29 This volume introduces and discusses the achievements and mechanisms of urban planning and construction in China from multiple professional perspectives covering practices and processes ranging from ancient times to the present day The book has 14 chapters each addressing a specific Chinese urban planning and construction topic with examples and applications in various cities and regions and each providing an all around analysis of Chinese urban development issues at different scales including government administrations planning progresses urban investments social impacts and construction models The book provides a

comprehensive overview of urban planning and construction in China especially its successful experiences in the historical period and modern era which will greatly benefit scholars and readers who are interested in China as well as urban planners architects and historians The book is organized into 4 main parts Part 1 focuses on historical wisdom to summarize ancient Chinese efforts to cope with nature and the environment It interprets the unique wisdom of ancient Chinese cities related to regional design water conservancy system and urban districts Part 2 presents the transformation of urban planning in China by learning from both the traditional value and western experiences based on several cases such as the spatial development of Beijing and the Beijing Tianjin Hebei capital region the preservation of Qingdao city the urban community development and regeneration in Chongqing city Part 3 explores the green and eco city by looking towards the future illustrating Chinese practices and efforts to build more sustainable cities such as green and low carbon city construction in Wuhan healthy city planning and eco cities construction in China Part 4 prospects the modern miracles brought forth by technological innovation and economic growth and introduces the newest planning trends in China such as the E commerce Taobao villages in China and the innovation districts in Beijing It also explains the driving force of the growth machine of Suzhou city

**Actor Networks of Planning** Yvonne Rydin, Laura Tate, 2016-02-12 Planning is centrally focused on places which are significant to people including both the built and natural environments In making changes to these places planning outcomes inevitably benefit some and disadvantage others It is perhaps surprising that Actor Network Theory ANT has only recently been considered as an appropriate lens through which to understand planning practice This book brings together an international range of contributors to explore such potential of ANT in more detail While it can be thought of as a subset of complexity theory given its appreciation for non linear processes and responses ANT has its roots in the sociology of scientific and technology studies ANT now comprises a rich set of concepts that can be applied in research theoretical and empirical It is a relational approach that posits a radical symmetry between social and material actors or actants It suggests the importance of dynamic processes by which networks of relationships become formed shift and have effect And while not inherently normative ANT has the potential to strengthen other more normative domains of planning theory through its unique analytical lens However this requires theoretical and empirical work and the papers in this volume undertake such work This is the first volume to provide a full consideration of how ANT can contribute to planning studies and suggests a research agenda for conceptual development and empirical application of the theory
