## The Clam Shell:

Investigation of a Clamshell Roll-out Ejection Concept Lawrence F. Hatakeyama,1971 The equations for the motion forces and couples generated by clamshells released from spinning sounding rockets in accordance with a roll out ejection concept are presented The application of these equations to a study of a system for the Javelin i e Honest John Nike Nike X248 rocket vehicle is discussed The roll out ejection concept advocated requires that each deploying clamshell be pivoted about an axis at its trailing edge located in the system sectioning plane Clamshell despinning is a consequence of this deployment since the pivotal i e roll out rate is in opposition to the rocket vehicle spin The energy required by the deployment is derived largely from the rotational energy of the clamshell Thus the rocket vehicle will not be significantly despun by this kind of clamshell deployment This ejection concept also permits a system design which makes it possible to limit clamshell angular motion to rotation about that one of its centroidal principal axes which is brought into parallelism with the rocket vehicle longitudinal axis Also by equalizing the moments of inertia about the other centroidal principal axes the rollout motion can be decoupled from any extraneous angular motion about these axes Shell Craft Virginia Fowler Elbert, Virginie Fowler,1993-10-01 Easy to follow instructions for decorative boxes mirror frames soap dishes jewelry napkin holders paperweights much more Profusely illustrated Includes list of supply sources Equations for a Study of a Roll-out Clamshell Ejection Concept for Spinning Rocket Vehicles Lawrence F.
