Thinking Through Television:

Thinking Through Television Lorenz Engell, 2025-10-01 Media philosophy can only be found and revealed in media themselves The essays collected in this volume thus approach television as a medium both of thought and of action in its own right Through its specific forms and practices television implements and reflects on aspects of time such as synchronicity and succession seriality and event history and memory Additionally television stages new forms of thinking causality and agency subject object relations tactility choice and other founding concepts of everyday experience as well as of outstanding philosophical relevance In the course of media evolution television organizes the transition from the analogue to the digital Last not least by conceiving of itself television offers a source of finally thinking through television [Thinking Through](#)

[Television](#) Ron Lembo, 2000-10-19 This original and engaging book investigates American television viewing habits as a distinct cultural form Based on an empirical study of the day to day use of television by working people it develops a unique theoretical approach integrating cultural sociology post modernism and the literature of media effects to explore the way in which people give meaning to their viewing practices While recognising the power of television it also emphasises the importance of the social and political factors which affect the lives of individual viewers showing how the interaction between the two can result in a disengagement with corporately produced culture at the same time as an appropriation of the images themselves into people s lives **Thinking Through Communication** Adam Roth, Brenton Malin, Sarah

Trenholm, 2025-04-14 This fully updated tenth edition for hybrid introductory communication courses provides a balanced introduction to the fundamental theories and principles of communication The book explores communication in a variety of contexts including interpersonal group organizational and mass media It provides students with the theoretical knowledge and the research and critical thinking skills they will need to succeed in advanced communication courses and professions Organized into three parts this new edition first explores the history of communication studies and explains the basic perspectives used by scholars in the field Part II looks at how language and listening take place in small and large groups Part III then examines global institutional and public communication This edition includes an additional chapter on research methods reflects the changing nature and norms of communication in the workplace and provides a post COVID assessment of models methods and evaluations of telecommuting practices The appendix gives users the flexibility to tailor their courses to the interests and needs of their students offering guidelines for preparing and presenting public presentations and giving examples of major research methods Thinking Through Communication is an ideal textbook for Introduction to Communication courses that aim to provide a comprehensive overview of the field Material for instructors including PowerPoint slides test questions and an instructor s manual are available at www.routledge.com 9781032499079

[Television and the Self](#) Kathleen M. Ryan, Deborah A. Macey, 2013-04-05 Sitting prominently at the hearth of our homes television serves as a voice of our modern time Given our media saturated society and television s prominent voice and place

in the home it is likely we learn about our society and selves through these stories These narratives are not simply entertainment but powerful socializing agents that shape and reflect the world and our role in it Television and the Self Knowledge Identity and Media Representation brings together a diverse group of scholars to investigate the role television plays in shaping our understanding of self and family This edited collection s rich and diverse research demonstrates how television plays an important role in negotiating self and goes far beyond the treacly very special episodes found in family sitcoms in the 1980s Instead the authors show how television reflects our reality and helps us to sort out what it means to be a twenty first century man or woman

The Switch Image Lorenz Engell, 2021-04-22 Television is the most powerful system of images in the late 20th and early 21st centuries Nonetheless TV has attained only little philosophical attention so far especially compared to other visual media such as film This book looks at TV as what happens on the screen and beyond it which is mainly the operation of switching images It therefore proposes a new definition of TV as the first picture that can be switched on off and over which stresses that TV is more tactile than visual Through the operation of switching TV figures the world from within and as the course of its figuration This is grasped here by the term of ontography Through the ongoing interlacing and bridging of TV 1 0 the image is being switched and TV 2 0 the image is a switch TV exponentially increases the production and circulation of images It transforms the world and itself from an analogue state to a digital one and from central perspectivism to pluri perspective In terms of time through switching and the switch it develops and reworks new temporal orderings such as instantaneity synchronicity flow and seriality TV makes its own history In space it creates a mediasphere as its habitat and hence new forms of being in the world of proximity and distance and scale Anthropologically it works on what a subject and an object is on what makes the human being and ontographically how it is possible that there is something at all instead of nothing
