future of humanity In *Time and the Technosphere* Jos Arg elles presents a groundbreaking study that distinguishes the natural time of the cosmos from the artificial mechanistic time under which we currently live Arg elles defines the actual nature of time as the frequency of synchronization Applying this Law of Time to an understanding of the entire system of life on Earth he shows that in order to not destroy Earth s ability to sustain life we must change our definition of time and adopt a natural harmonic calendar based on the 13 moon 28 day cycle Until the creation of the Gregorian calendar and the 60 minute hour most of humanity lived by the 28 day cycle of natural time The adoption of artificial time has subjected us to a 12 60 time frequency that governs the entire global industrialized civilization the technosphere With the collapse of the Twin Towers on September 11 a fissure was created in this artificial technosphere opening up the noosphere Earth s mental envelope Humanity has a golden opportunity to leave the strife of the past and enter a time of peace by adopting a harmonious natural calendar that will repair the damages caused by the irregular tempo of technospheric time Our last best chance to adopt this natural time and step into the bright new future promised by the galactic shift of 2012 is the Great Calendar Change of 2004 a new discovery based on the author s mathematical research into the Mayan calendar first begun in his landmark work *The Mayan Factor In Time and the Technosphere* Arg elles reveals the clear distinction between third dimensional astronomical time and the fourth dimensional synchronic order of the Law of Time which holds enormous potential for the future of humanity

The Material Image Brigitte Peucker,2007 Focusing on intermediality *The Material Image* situates film within questions of representation familiar from the other arts What is meant by figuring the real How is the real suggested by visual metaphors and what is its relation to illusion How is the spectator figured as entering the text and how does the image enter our world The film s spectator is integral to these concerns Cognitive and phenomenological approaches to perception alike claim that spectatorial affect is real even when it is film that produces it Central to the staging of intermediality in film tableaux moments in film also figure prominently in the book Films by Scorsese Greenaway Wenders and Kubrick are seen to address painterly photographic and digital images in relation to effects of the real Hitchcock s films are examined with regard to modernist and realist effects in painting Chapters on Fassbinder and Haneke analyze the significance of tableau for the body in pain while a final chapter on horror film explores the literalism of psychopathic tableau Here too art and the body images and the real are juxtaposed and entwined in a set of relations
