Trees Around Us:

The Trees Around You Casey Clapp, 2025-10-01 A visually rich and entertaining field guide to identifying common trees in the Pacific Northwest's urban and suburban areas. User-friendly organization and 700 plus photos of bark, flowers, leaves, and more to clarify, compare, and contrast species. Includes 350 of the most common tree species found in urban and suburban settings in the Pacific Northwest. Focuses on making tree identification easy and rewarding. Tree educator, host of the Completely Arborist podcast, and arborist Casey Clapp shares his knowledge and enthusiasm in this first-ever field guide to focus on the most common trees in the Pacific Northwest's urban and suburban areas. Clapp's innovative Stepwise Journey guides readers through a progression of key clues for tree identification while line drawings, phenology calendar, and over 700 photos provide clear visual references. Clapp covers more than 300 species, altogether with 150 featured species highlighted in extended profiles that cover key details including common and scientific names, physical descriptions of the bark, leaves, and seed cones, notes on where to look for specific species, and distinguishing characteristics of related trees. From oaks to maples to conifers, Clapp gives everyone the tools and confidence to take this book outside and identify the trees in their own backyard, along their street, or in their local parks. In *The Trees Around You*, Casey Clapp demystifies tree identification while spreading joy and enthusiasm for paying closer attention to the trees that surround us every day.

Animals Around Us Dorine Barbey, 1998 Describes the behaviors and life cycles of various animals from dogs, cats, and sheep to mice, bats, and birds, as well as how they interact with humans. *The Trees of Northeastern America* Charles Stedman Newhall, 1890

Canopy Cities Timothy Beatley, 2023-12-21 This book provides a comprehensive overview of the essential role of trees and forests in cities and examines the creative approaches cities around the world are taking to protect trees and expand their urban forests. Moving beyond the view that trees are luxuries and therefore non-essential to the life of a city, the book examines urban tree policies and approaches that foster tree protection, including tree codes and bylaws, and calls for greater community engagement to preserve this important facet of urban life. Through an international range of examples and case studies featuring cities in the United States, Canada, Singapore, the Netherlands, Australia, France, New Zealand, Mexico, Sierra Leone, and the United Kingdom, the book offers best practice examples where trees have been further integrated into the fabric of urban planning and design, including forested towers, interior rainforests, tiny urban forests, and metropolitan forests. Written by a leading authority in the field, this is a fascinating read for researchers, students, and practitioners in urban planning, landscape architecture, and environmental policy and planning.

The Embodied Teen Susan Bauer, 2018-07-17 The first book to offer a somatic movement education curriculum adapted to the unique needs of adolescents. Susan Bauer presents a groundbreaking curriculum for teaching teens how to integrate body and mind, enhance kinesthetic intelligence, and develop the inner resilience they need to thrive now and into adulthood.
