Trends In Nonlinear Analysis:

Trends in Nonlinear Analysis Markus Kirkilionis, Susanne Krömker, Rolf Rannacher, Friedrich Tomi, 2013-04-17 Applied mathematics is a central connecting link between scientific observations and their theoretical interpretation Nonlinear analysis has surely contributed major developments which nowadays shape the face of applied mathematics At the beginning of the millennium all sciences are expanding at increased speed Technological ecological economical and medical problem solving is a central issue of every modern society Mathematical models help to expose fundamental structures hidden in these problems and serve as unifying tools to deepen our understanding What are the new challenges applied mathematics has to face with the increased diversity of scientific problems In which direction should the classical tools of nonlinear analysis be developed further How do new available technologies influence the development of the field How can problems be solved which have been beyond reach in former times It is the aim of this book to explore new developments in the field by way of discussion of selected topics from nonlinear analysis

Theoretical and numerical trends in nonlinear analysis, 1979

Nonlinear Analysis Research Trends Inès N. Roux, 2009 Non linear analysis is a broad interdisciplinary field characterised by a mixture of analysis topology and applications Its concepts and techniques provide the tools for developing more realistic and accurate models for a variety of phenomena encountered in fields ranging from engineering and chemistry to economics and biology This book presents the latest research from around the globe
