The Family Business as a Socialisation Context for the Children of Entrepreneurs Simon Caspary, 2024-05-28 Simon Caspary examines how the socialisation of offspring from entrepreneurial families is influenced by the existence of a family business To answer the initial question a pluralistic approach is chosen that maps the mechanisms and influencing variables on the socialisation and identity formation of the offspring In addition to a dedicated overview of the relevant literature the comprehensive theoretical review makes a significant contribution to advancing knowledge of the socialisation context of family businesses in academic discourse

The Performative Enterprise Alexander Tsigkas, 2021-10-01 This book is about quality redundancy and its replacement by the performativity norm Performativity is a linguistic social and political mechanism that produces the intended performance The author Alexander Tsigkas sees this book as a natural continuation of his prior book *The Lean Enterprise From the Mass Economy to the Economy of One* He argues that performativity is the flip side of quality on a coin called identity and in postmodernism that is in the age of Industry 4.0 and beyond companies should be aiming for performativity and achieve quality as one of its many consequences The author therefore encourages modern businesses to transition from quality orientation as conformance alone to a performance orientation The author brings forward historic current and philosophical perspectives in charting performativity as a new goal for modern businesses Many examples case studies and conceptual constructs are used to drive in the idea of how to create a performative enterprise

The Evolutionary Dynamics of Discursive Knowledge Loet Leydesdorff, 2021-01-01 This open access book addresses three themes which have been central to Leydesdorff's research 1 the dynamics of science technology and innovation 2 the scientometric operationalization of these concept and 3 the elaboration in terms of a Triple Helix of university industry government relations In this study I discuss the relations among these themes Using Luhmann's social systems theory for modelling meaning processing and Shannon's theory for information processing I show that synergy can add new options to an innovation system as redundancy The capacity to develop new options is more important for innovation than past performance Entertaining a model of possible future states makes a knowledge based system increasingly anticipatory The trade off between the incursion of future states on the historical developments can be measured using the Triple Helix synergy indicator This is shown for example for the Italian national and regional systems of innovation

The Knowledge-based Economy Loet Leydesdorff, 2006 Challenging theoretically rich yet anchored in detailed empirical analysis Loet Leydesdorff's exploration of the dynamics of the knowledge economy is a major contribution to the field Drawing on his expertise in science and technology studies systems theory and his internationally respected work on the triple helix the book provides a radically new modelling and simulation of knowledge systems capturing the articulation of structure communication and agency therein This work will be of immense
