Epidemiology by Design Daniel Westreich, 2020 A LONG OVERDUE CAUSAL APPROACH TO INTRODUCTORY EPIDEMIOLOGY Epidemiology is recognized as the science of public health evidence based medicine and comparative effectiveness research Causal inference is the theoretical foundation underlying all of the above No introduction to epidemiology is complete without extensive discussion of causal inference what s missing is a textbook that takes such an approach Epidemiology by Design takes a causal approach to the foundations of traditional introductory epidemiology Through an organizing principle of study designs it teaches epidemiology through modern causal inference approaches including potential outcomes counterfactuals and causal identification conditions Coverage in this textbook includes Introduction to measures of prevalence and incidence survival curves risks rates odds and measures of contrast differences ratios the fundamentals of causal inference and principles of diagnostic testing screening and surveillance Description of three key study designs through the lens of causal inference randomized trials prospective observational cohort studies and case control studies Discussion of internal validity within a sample external validity and population impact the foundations of an epidemiologic approach to implementation science For first year graduate students and advanced undergraduates in epidemiology and public health fields more broadly Epidemiology by Design offers a rigorous foundation in epidemiologic methods and an introduction to methods and thinking in causal inference This new textbook will serve as a foundation not just for further study of the field but as a head start on where the field is going

Diabetes Technology Boris Draznin, 2019-06-17 We live in a century of technological revolution and the birth of artificial intelligence Like every other sphere of our life diabetes related technology is moving forward with lightning speed New and improved insulin administration devices increased capacity for monitoring one s blood glucose levels and the ability to communicate directly with the device supplying insulin as well as with the patient and his her healthcare provider have changed diabetes therapy forever The problem is that diabetes related technology is moving ahead much faster than physicians and other healthcare professionals can incorporate these advances into our practices Diabetes Technology will consist of three parts Part I addresses the clinical science of diabetes pumps continuous glucose monitoring and communication technology with numerous practical aspects Part III offers personal stories of healthcare providers who treat their own diabetes with modern diabetes technology In particular they will address how and why they decided to use this technology and the positive and negative aspects of their decision
