

# STRATEGIC MANAGEMENT ACCOUNTING

**"Accounting exists within an business primarily to facilitate the development and implementation of business strategy..."**

**Three important generalizations emerge from this way of viewing management accounting:**

- **Accounting is not an end in itself, but only a means to help achieve business success**
- **Specific accounting techniques or systems must be considered in terms of the role they are intended to play**
- **In evaluating the overall accounting system... the key question is whether the overall fit with strategy is appropriate."**

Shank, John K. and Vijay Govindarajan, Strategic Cost Management, The Free Press, Macmillan, Inc., 1993, pp. 6-7.

**Management** Elena G. Popkova,2017-09-03 This book is the result of recent research by contemporary scientists on topics which were discussed at the conference of the same name in Volgograd Russia in April 2017 The global economic system is currently in a stage of active formation and development its boundaries and conditions of existence are constantly changing which is accompanied by crises that influence the economic systems of its member countries In order to solve problems emanating from global economic crises a new direction was formed in modern science global crisis management Development of this direction requires the formation of the accompanying categorical apparatus the development of a corresponding scientific and methodological basis and the engagement in extensive practical research *Management Accounting* Chris Hunt,Carolyn Joy Fowler,2009 Organisations today are operating in an ever changing and more risky external business environment To survive and grow in this environment it is now more important than ever that the information needs o the organisation are shaped by its goals and objectives and driven by its strategy choices These strategy

choices determine the processes and activities necessary to achieve the organisational objectives and goals. The resulting organisational outcomes contribute to the generation of owner wealth and increased organisational value and in doing so recognise the value adding potential of significant organisational relationships such as those with suppliers and customers. From a management accountant's perspective these strategy choices define the design function and operation of the organisation's management control systems and its underpinning performance management system. The focus of this book is on accounting for an organisation's external business environment and the associated risk implications for decision making and performance management. It is about accounting for operating strategies, processes and activities and the incorporation of risk into these strategic decisions and the management of performance. The tools, techniques and frameworks available to the management accountant are drawn from those used in traditional and contemporary management accounting as well as those developed through a strategy based value chain lens and a discussion on how strategy based accounting might be achieved.

**The Role of Management Accounting Systems in Strategic Sensemaking** Marcus Heidmann, 2008-03-13  
Marcus Heidmann explores the role of management accounting systems (MAS) in strategic sensemaking. Based on cognitive theories the author defines strategic sensemaking as a learning process with observation, interpretation and communication as the relevant process steps on the individual level. He illustrates the impact of MAS on these cognitive processes by an exploratory multiple case study design.
