recent findings in neuroscience and a renewed awareness of the sociocultural contexts of childhood as well as by studies which acknowledge the importance of boisterous rough and tumble play activities for children's development. And throughout they remind readers and practitioners of the important distinction between play as a spontaneous activity of children, play as such, and the play which educators offer as a medium for learning. Elizabeth Brooker, Course Leader MA in Childhood Studies, Institute of Education. This book provides a thorough and up-to-date overview of the topical issue of teaching and learning through play. Chapters cover issues including assessment through play, the role of adults in children's play, the impact of play on social and emotional learning, and how to develop a whole school approach to learning through play. This book is theoretical and detailed but extremely interesting, and there is certainly practical information to be found in it. *Early Talk*, This timely Second Edition explores recent developments which strongly endorse play as an integral part of the curriculum. The content has been fully revised to reflect contemporary thinking about the role and value of play in early childhood and beyond. A key focus is the provision of a secure theoretical and practical grounding for developing a pedagogy of play. In the first section, the authors provide an overview of recent developments in education policies and reviews of research into different aspects of play. In the second section, the emphasis is on classroom practice, specifically organizing and developing play with particular reference to the Foundation Stage and Key Stage 1, establishing progression and continuity with Key Stage 1, assessing children's learning through play, the role of adults in children's play, using the plan-do-review approach to integrate child-initiated and adult-directed play, the importance of socio-dramatic play for children's social and emotional learning, and developing a whole school play ethos. This book enables practitioners to create unity between play, learning, and teaching, and to improve the quality of children's learning. New material provided by practitioners has been added to show how this unity can be successfully achieved. This is an essential text for students of education. It is highly recommended to those undertaking degrees in Childhood Studies and those on Initial Teacher Training programmes in early years and primary education.

Gronlund, 2012-11-16. Play is an important vehicle for learning in the early years. With intentional planning frameworks, this resource provides teachers with tools and strategies to organize and develop curriculum around high-level, purposeful play. Practical application techniques help teachers create a cycle of planning and observation as they use a play-based curriculum to help young children thrive in the classroom. Grotewell, Yanus R. Burton, 2008. This book focuses on early childhood education, which spans the human life from birth to age 8. Infants and toddlers experience life more holistically than any other age group. Social, emotional, cognitive, language, and physical lessons are not learned separately by very young children. Adults who are most helpful to young children interact in ways that understand that the child is learning from the whole experience, not just that part of the experience to which the adult gives

attention Although early childhood education does not have to occur in the absence of the parent or primary caregiver this term is sometimes used to denote education by someone other than these the parent or primary caregiver Both research in the field and early childhood educators view the parents as an integral part of the early childhood education process Early childhood education takes many forms depending on the theoretical and educational beliefs of the educator or parent Other terms that is often used interchangeably with early childhood education are early childhood learning early care and early education Much of the first two years of life are spent in the creation of a child s first sense of self or the building of a first identity Because this is a crucial part of children s makeup how they first see themselves how they think they should function how they expect others to function in relation to them early care must ensure that in addition to carefully selected and trained caregivers links with family home culture and home language are a central part of program policy If care becomes a substitute for rather than a support of family children may develop a less than positive sense of who they are and where they come from because of their child care experience *Building Blocks for Teaching Preschoolers with Special Needs* Susan Rebecka Sandall,Ilene S.
