Teaching Young Children: Choices In Theory And Practice Mac Naughton, Glenda, Williams, Gillian, 2008-11-01 This book presents early childhood students and staff with a broad and diverse range of teaching techniques to support children's learning. It examines 26 techniques ranging from simple ones such as describing and listening to more complex methods such as deconstruction and scaffolding. The strategies selected are derived from the best current research knowledge about how young children learn. A detailed evaluation of each strategy enables childcare staff, early childhood teachers, and students to expand their repertoire of teaching strategies and to critically evaluate their own teaching in early childhood settings. Vignettes and examples show how early childhood staff use the techniques to support children's learning and help to bring the discussion of each technique to life. Revised and updated in light of the latest research, new features include: Coverage of the phonics debate; Addition of ICT content; Questions for further discussion; Revision to the chapter on problem solving; Updated referencing throughout. *Teaching Young Children* is key reading for students and experienced early childhood staff working in diverse settings with young children.

Teaching Kids to Pause, Cope, and Connect Mark Purcell, Kellen Glinder, 2022-10-31 Thirty hands on lessons provide students opportunities to learn and practice self-regulation strategies. Students today face many challenges that did not exist a generation or two ago, and rates of emotional disorders including anxiety and depression have increased steadily over the years. Students must also manage an overwhelming amount of information. With today's reliance on technology and social media, they have fewer opportunities to develop effective self-regulation strategies and interpersonal and stress management skills. Helping students understand their emotions and behavior when they're young will set them on a path to being successful learners and empathetic people throughout their lives. With thirty easy-to-implement skill-based lessons and activities, *Teaching Kids to Pause, Cope, and Connect* provides educators with strategies to help students manage and reduce their anxiety with healthy coping skills, understand and regulate physical responses to stress, separate emotions from actions, respond mindfully rather than impulsively to difficult situations, improve social skills, social awareness, and self-regulation, develop empathy and compassion. Digital content includes reproducible student handouts that accompany each lesson plus six bonus lessons.
