Teaching and Learning at a Distance Michael Simonson, Susan M. Zvacek, Sharon Smaldino, 2019-07-01 Teaching and Learning at a Distance is written for introductory distance education courses for preservice or in service teachers and for training programs that discuss teaching distant learners or managing distance education systems This text provides readers with the basic information needed to be knowledgeable distance educators and leaders of distance education programs The teacher or trainer who uses this book will be able to distinguish between appropriate uses of distance education In this text we take the following themes The first theme is the definition of distance education Before we started writing the first edition of Teaching and Learning at a Distance we carefully reviewed the literature to determine the definition that would be at the foundation of our writing This definition is based on the work of Desmond Keegan but is unique to this book This definition of distance education has been adopted by the Association for Educational Communications and Technology and by the Encyclopedia Britannica The second theme of the book was the importance of research to the development of the contents of the book The best practices presented in Teaching and Learning at a Distance are validated by scientific evidence Certainly there are rules of thumb but we have always attempted to only include recommendations that can be supported by research The third theme of Teaching and Learning at a Distance is derived from Richard Clark s famous quote published in the Review of Educational Research that states that media are mere vehicles that do not directly influence achievement Clark s controversial work is discussed in the book but is also fundamental to the book s advocacy for distance education in other words we authors did not make the claim that education delivered at a distance was inherently better than other ways people learn Distance delivered instruction is not a magical approach that makes learners achieve more The fourth theme of the book is equivalency theory Here we presented the concept that instruction should be provided to learners that is equivalent rather than identical to what might be delivered in a traditional environment Equivalency theory helps the instructional designer approach the development of instruction for each learner without attempting to duplicate what happens in a face to face classroom The

final theme for Teaching and Learning at a Distance is the idea that the book should be comprehensive that it should cover as much of the various ways instruction is made available to distant learners as is possible It should be a single source of information about the field Digital Education Tools Paul David,2021-03-06 Education is the gateway to achievement and in today s world learning can take place both in a standard school setting and digitally Online learning is the study process without having to attend classes or lectures physically and mobile learning helps to make online learning more effective by being able to access knowledge and skills easily through the internet via smartphones and other devices we have today In this book more than a hundred apps and websites are listed to help both students and educators to find engaging teaching and learning tools **Distance Learning** ,2000 Thriving as an Online K-12 Educator Jody Peerless Green,2020-11-01 Thriving as an Online K 12 Educator is the perfect all in one guide to taking your K 12 class online We know now more than ever that teachers have not been equally or systematically trained and resourced to make a sudden transition to online or blended instruction This concise accessible book collects time tested strategies and fresh perspectives from experienced educators to help you smooth out even the most abrupt shift to technology enhanced teaching and learning With these insights into institutional supports effective digital tools equitable practice social emotional considerations and beyond you will be better prepared than ever to help your students thrive in online and blended learning environments *The Distance Learning Playbook for College and University Instruction* Douglas Fisher,Nancy Frey,John Almarode,John Hattie,2020-08-20 First let s commend ourselves how in the midst of a pandemic we faculty stepped up at record speed to teach in such a foreign learning environment Try we did adapt we did and learn we did But to be clear and we already recognize this this past spring was less about distance learning and more about crisis teaching This time around we have the opportunity to be much more purposeful and intentional and that s where *The Distance Learning Playbook for College and University Instruction* will prove absolutely indispensable Much more than a collection of cool tools and apps *The Distance Learning Playbook for College and University Instruction* mobilizes decades of Visible Learning research to reveal those evidence based strategies that work best in an online environment Supplemented by video footage and opportunities to self assess and reflect the book addresses every dynamic that must be in place for students to learn even at a distance Faculty student relationships from a distance Teacher credibility from a distance Teacher clarity from a distance Engaging tasks from a distance Planning learning experiences from a distance Feedback assessment and grading from a distance Keeping the focus on learning from a distance or otherwise What does our post COVID future hold We suspect Fisher Frey Almarode and Hattie write it will include increased amounts of distance learning In the meantime let s seize on what we have learned to improve post secondary education in any format whether face to face or from a distance We are all still active faculty members committed to teaching scholarship and service The unexpected transition to remote learning doesn t mean we no longer know how to teach We can still impact the lives of our students and know that we made a difference *The Distance Learning*
