Teaching With The Internet Lessons From The Classroom:

The Internet and the Language Classroom Gavin Dudeney,2007-03-08 The fully updated edition of this popular book offers a wealth of ideas for using the Internet as a teaching tool

Teaching with the Internet Donald J. Leu,Deborah Diadiun Leu,2000 Provides information for teachers on how to integrate the Internet into their classrooms focusing on how to use the technology for teaching and learning and includes examples from real life classrooms as well as addresses for helpful sites

[Bringing the Internet to School](#) Janet Ward Schofield,Ann Locke Davidson,2002-03-05 Presenting the results of the first major study of technology implementation in schools examining the positive and negative consequences of the Internet on equity academics and social life the authors draw on over 300 interviews with teachers students and administrators done over the course of five years and offer an assessment of the underlying cultural issues that will ultimately determine the speed and success of technology integration

Teaching in the Digital Age Kristen Nelson,2008 An excellent resource that gives teachers both novice and veteran ideas on how to integrate technology into the classroom even if the teacher is a regular user This second edition will become a good friend for those who want to use the Internet in their teachings

Amie Brown Reading and Language Arts TeacherCoosa Middle School Rome GA Through technology students can learn using tools they are comfortable with and that will help them develop skills for greater productivity in a global society With theory from this book teachers can model Internet activities for creativity and engaged learning for higher student achievement

Beverly R Plein Technology FacilitatorBenjamin Franklin Middle School Teaneck NJ Connect brain compatible learning with the Internet to encourage active student involvement

In *Teaching in the Digital Age Second Edition* Kristen Nelson illustrates how teaching and learning are strengthened when Web resources are integrated with brain based instruction to meet students individual learning needs The author supplies the tools and framework for using Internet based brain friendly activities to promote students comprehension across content areas This practical how to book demonstrates how teachers can design their own projects to enhance information literacy while deepening students understanding of critical concepts and skills Offering an updated list of Web sites the second edition assists educators by providing Internet assignments to develop skills in interpersonal exchange information gathering and analysis and problem solving

Standards based lesson plans that build on student strengths Assessment rubrics to identify learning needs This text is an invaluable handbook that combines educational theory instructional practice digital literacy and current brain based research to encourage student engagement and increase achievement for all learners

NetLearning Ferdi Serim,Melissa Koch,1996 In this book NetAngels Internet users exploring the Internet s potential for education share stories to help teachers uncover the benefits of using this medium to its fullest potential in the classroom The stories take the reader through the use of tools from a teacher s perspective and provide tips on how to effectively integrate the tools and resources into the classroom

Learning from Cyber-savvy Students Anne Hird,2000 As the Internet has become a common household utility more

and more students are coming to school with Internet experience How do students and teachers roles and schools as institutions change when these Internet Age kids enter classrooms that are fully equipped with networked computers This book offers a unique analysis of the issues and challenges teachers face as their classrooms become fully connected to the Internet Anne Hird spent six months observing a class in a school with fully connected classrooms She presents a vivid and insightful account often reported through the students own words of how young teens use computers in and out of school how they perceive the world shaped by the Internet and how these factors shape their expectations for classroom learning She observes and reflects on the paradox which confronts teachers in this environment They are expected to guide students in learning with a cognitive tool that was not part of the teachers experience as students while students familiarity with the Internet calls into question the authority of the teacher on which the traditional teacher student relationship is based She offers a strategy for professional development which recognizes and builds on this inevitable shift in the teacher student relationship This is an absorbing thought provoking and practical book for all educators individual teachers and administrators alike concerned about the integration of computer technology into elementary and secondary school classrooms Teaching Grades K-12 with the Internet Timothy P. Dougherty, David N. Kershaw, 1997 *Using the Internet for Active Teaching and Learning* Steven C. Mills, 2006 For courses in Computers in Education Are you ready to make use of the power of the Internet to support your teaching Using the Internet for Active Teaching and Learning combines both theory and practice to introduce you to the Internet s potential as a teaching tool in your classroom With student learning as its goal the book is organized by its functions in the classroom from communication to locating and evaluating information publishing information information problem solving cooperative problem solving inquiry and discovery and online collaborations

Network Science, A Decade Later Alan Feldman, Cliff Konold, Bob Coulter, Brian Conroy, 2000-01-12 Network Science A Decade Later the result of NSF funded research that looked at the experiences of a set of science projects which use the Internet offers an understanding of how the Internet can be used effectively by science teachers and students to support inquiry based teaching and learning The book emphasizes theoretical and critical perspectives and is intended to raise questions about the goals of education and the ways that technology helps reach those goals and ways that it cannot The theoretical perspective of inquiry based teaching and learning in which the book is grounded is consistent with the current discipline based curriculum standards and frameworks The chapters in Part I State of the Art describe the history and current practice of network science Those in Part II Looking Deeply extend the inquiry into network science by examining discourse and data in depth using both empirical data and theoretical perspectives In Part III Looking Forward the authors step back from the issues of network science to take a broader view focusing on the question How should the Internet be used and not used to support student learning The book concludes with a reminder that technology will not replace teachers Rather the power of new technologies to give students both an overwhelming access to resources experts peers teachers
