Paranormal States D. E. Osto, 2024-09-10 A number of converts to Buddhism report paranormal experiences Their accounts describe psychic abilities like clairvoyance and precognition out of body experiences near death experiences and encounters with other beings such as ghosts and deities and they often interpret these events through a specifically Buddhist lens This book is a groundbreaking exploration of these phenomena and their implications for both humanistic and scientific study of the paranormal D E Osto examines accounts of paranormal phenomena experienced by convert Buddhists from around the world collected through an online survey and interviews placing them in the context of Indian Buddhist sources and recent scientific research They focus in detail on the life stories of two interviewees and the important role the paranormal has played in their lives These contemporary first person narratives demonstrate the continued importance of the psychic and paranormal within the Buddhist tradition and they can be interpreted as a living Buddhist folklore Osto considers the limitations of both traditional religious views and Western scientific studies of the paranormal and proposes instead a new Buddhist phenomenological approach Ultimately Paranormal States contends these deeply mysterious and extraordinary experiences exceed current understandings and they can help bridge the gap between religious and scientific worldviews

Psychotherapy, the Alchemical Imagination and Metaphors of Substance Alan Bleakley, 2023-07-04 Alchemy is popularly viewed as a secret way of turning worthless base metal into gold and then a precursor to modern chemistry This is often taken as a metaphor for psychological development This book describes an innovative third way for both the education and exercise of an alchemical imagination that embraces both material matters and psychological insight alchemy as lyrical poetics or the intensive production of embodied metaphor Alchemy here is viewed as an immanent set of metaphor driven best practices for indwelling complex and contradictory earthly matters in a sensual artistic and humane manner Or again it describes best psychotherapeutic practice Alchemy is read not as a medium for personal growth but optimal co existence with the natural world It is an eco logical rather than ego logical project with deep aesthetic concerns education of the senses in close noticing and political intentions a democracy of

worldly things The book echoes post Freudian developments in psychoanalysis that avoid the mysticism of symbol systems to work rather with everyday signs and linguistic registers such as embodied metaphors keeping the focus on known and sensed phenomena rather than abstractions

Alchemy in the Anthropocene Alan Bleakley, 2025-10-02 Medieval and Renaissance European alchemy peaking at the time of Shakespeare is a heavily coded symbolic system There are two historical streams to alchemy First as a misguided literal attempt to convert base metals into gold that acted as a precursor to modern chemistry Second as an abstract symbol system whose development and study aimed at gaining higher consciousness Carl Jung single handedly recovered this alchemical tradition for modern times by treating alchemy as a coded symbol system of psychological growth and enlightenment tapping into archetypes This book offers a third way between matter and symbol alchemy as embodied metaphor transcending the literal and engaging the poetic This approach differs from that of Jung who turned a materialist alchemy into an abstract psychological code In the approach taken in this book alchemy offers an education into an imagination of matter offering a framework for contemporary living where a language of substances replaces abstract terms describing psychological life But alchemy has other meanings and purposes for example as a once outlawed activity promising jail sentences for practitioners alchemy is essentially political It restores power not just to citizens to resist orthodoxies but also to material life otherwise seen as inanimate Giving meaning to the natural material world echoes indigenous traditions that see this world as animated and populated by unseen but felt energies Such energies are the lifeblood of imagination and creativity as the poetic impulse in humanity The Anthropocene is an emergent age of ecological anxiety We need languages and symbol and sign systems to effectively navigate and make meaning of this unfolding age
