*Basic Writing in America* Nicole Pepinster Greene,Patricia J. McAlexander,2008 *Basic Writing in America* published three decades after Mina Shaughnessy's *Errors and Expectations* presents the kind of educational stories envisioned by The City University of New York's Patricia Laurence Each of these stories has its own unique setting conflict and outcome Yet together they give a powerful and dramatic portrait of basic writing in four year colleges and universities across the country In the Introduction the editors argue that basic writing programs involved a new concept of writing remediation Receiving impetus from the American civil rights movement these

programs defined postsecondary education not in terms of an investment for society but as an individual right. Indeed, a major purpose of basic writing was to facilitate the integration of underrepresented groups into America's colleges and universities. The chapters describe the often hostile responses to basic writing and its students, the low status of basic writing programs within English departments and universities, clashes within the basic writing field itself, pedagogical developments in composition as applied to basic writing, and the professionalization of basic writing faculty. They also show, as years pass, the raising of college admission standards, the elimination or downsizing of basic writing programs, and the channeling of less qualified students to two-year colleges. But in a number of institutions, there are also innovations and successes, including the emergence of a new type of basic writing program, one that is more integrated with the college or university and that offers learning support to a wider range of students.

Assessing Second Language Writing in Academic Contexts Liz Hamp-Lyons, 1991. This is the first volume to focus on the assessment of second language writing. The collection, as a whole, provides coverage of all issues in second language writing assessment, starting from the context in which and for which assessment must occur, moving through the aspects of decision making and design in a writing assessment program, and then considering how the need to evaluate any program on assessment can be carried out. After a discussion of issues of public reporting, an area which will receive increasing attention in the next few years, the volume closes with a discussion of what new issues and answers the future may bring. The book reflects the current belief in direct writing assessment in second language writing assessment. While it is often expected that those working with ESL students will focus on language error, throughout the book, themes of needs, attitudes, ideas, and content dominate. For second language writers, the use of written language to learn, to create knowledge, and to share ideas and beliefs are vitally important. Additionally, issues of cross-cultural academic literacy, practical information on criteria and scoring models for use with ESL writers, and research on the efficacy and effects of various assessment models are provided. The book blends theory and practice in a way which offers all those who are concerned with the writing skills of nonnative users of English an invaluable resource.

Validity Argument in Language Testing Carol A. Chapelle, Erik Voss, 2021-01-21. Language tests play pivotal roles in education, research on learning, and gate-keeping decisions. The central concern for language testing professionals is how to investigate whether or not tests are appropriate for their intended purposes. This book introduces an argument-based validity framework to help with the design of research that investigates the validity of language test interpretation and use. The book presents the principal concepts and technical terms, then shows how they can be implemented successfully in practice through a variety of validation studies. It also demonstrates how argument-based validity intersects with technology in language testing research and highlights the use of validity argument for identifying research questions and interpreting the results of validation research. Use of the framework helps researchers in language testing to communicate clearly and consistently about technical issues with each other and with researchers of other types of tests.
