Apocalyptic AI: Visions of Heaven in Robotics, Artificial Intelligence, and Virtual Reality Robert M. Geraci, 2010-02-05 Apocalyptic AI the hope that we might one day upload our minds into machines or cyberspace and live forever is a surprisingly wide spread and influential idea affecting everything from the world view of online gamers to government research funding and philosophical thought In Apocalyptic AI Robert Geraci offers the first serious account of this cyber theology and the people who promote it Drawing on interviews with roboticists and AI researchers and with devotees of the online game Second Life among others Geraci illuminates the ideas of such advocates of Apocalyptic AI as Hans Moravec and Ray Kurzweil He reveals that the rhetoric of Apocalyptic AI is strikingly similar to that of the apocalyptic traditions of Judaism and Christianity In both systems the believer is trapped in a dualistic universe and expects a resolution in which he or she will be translated to a transcendent new world and live forever in a glorified new body Equally important Geraci shows how this worldview shapes our culture Apocalyptic AI has become a powerful force in modern culture In this superb volume he shines a light on this belief system revealing what it is and how it is changing society Philosophy and the 'Dazzling Ideal' of Science Graham McFee, 2019-08-27 Recent decades have seen attacks on philosophy as an irrelevant field of inquiry when compared with science In this book Graham McFee defends the claims of philosophy against attempts to minimize either philosophy's possibility or its importance by deploying a contrast with what Wittgenstein characterized as the dazzling ideal of science This dazzling ideal incorporates both the imagined completeness of scientific explanation whereby completing its project would leave nothing unexplained and the exceptionless character of the associated conception of causality On such a scientific world view what need is there for philosophy In his defense of philosophy and its

truth claims McFee shows that rejecting such scientism is not automatically anti scientific and that it permits granting to natural science properly understood its own truth generating power Further McFee argues for contextualism in the project of philosophy and sets aside the pervasive and pernicious requirement for exceptionless generalizations while relating his account to interconnections between the concepts of person substance agency and causation
