## **Upcycling Ideas Framework:**

The Palgrave Handbook of Practical Sustainability Robert Brinkmann, Chit Wityi Oo, 2025-05-09 This book provides a comprehensive look at practical sustainability around the world. The book takes a distinctly regional case study perspective and highlights different approaches to managing sustainability challenges. Chapters by authors from all corners of the world look at a range of sustainability issues including environmental sustainability, environmental equity and justice, and government and business approaches to sustainability. The authorship of the book is distinctly global, which provides an important perspective to this volume. Each chapter focuses on a different sustainability problem and how it was addressed in the region. Readers will take away a tremendous amount of information as to how sustainability challenges are addressed by leaders throughout the globe.

The Upcycle William McDonough, Michael Braungart, 2013-04-16 From the authors Cradle to Cradle, the next step in how society must change the way it uses resources. Drawing on the lessons gained from 10 years of using the cradle to cradle concept, McDonough and Braungart envision the next step in the solution to our ecological crisis.

**Research Journeys to Net Zero** Kyungeun Sung, Patrick Isherwood, Richie Moalosi, 2024-04-19 This book provides useful insight into how academics from diverse disciplinary backgrounds such as science, engineering, technology, social science, policy, design, architecture, built environment, business, and management have been conducting research into how to realise net zero emissions to address climate change. This book explores the ways in which countries around the world have pledged to achieve net zero emissions through decarbonisation processes. It presents the highest calibre research and impact activities carried out in the UK, Europe, North America, Australia, Asia, and Africa. Such activities include conceptualisation, opportunity identification, specific case studies, demonstration of proof of concepts, provision of evidence, education of the general public, and knowledge transfer to companies. Further to this, the chapters also bring to light personal career journeys to net zero by current and future international research leaders. From this book, readers will gain a full understanding of net zero research via multiple disciplinary pathways, be inspired by personal accounts, and will learn key methodologies including quantitative and qualitative approaches. The diversity of authors and topics make the book widely applicable to a range of fields, and it will be of great interest to researchers, students, practitioners, and decision makers working towards the goals of net zero and decarbonisation.

*The Circular Economy and the Global South* Patrick Schröder, Manisha Anantharaman, Kartika Anggraeni, Timothy J. Foxon, 2019-04-12 The circular economy is a policy approach and business strategy that aims to improve resource productivity, promote sustainable consumption and production, and reduce environmental impacts. This book examines the relevance of the circular economy in the context of developing countries, something which to date is little understood. This volume highlights examples of circular economy practices in developing country contexts in relation to small and medium enterprises, SMEs, informal sector, recycling, and national policy approaches. It examines a broad range of case studies including Argentina, Brazil, China, Colombia, India, Indonesia, Kenya, South Africa, and

Thailand and illustrates how the circular economy can be used as a new lens and possible solution to cross cutting development issues of pollution and waste employment health urbanisation and green industrialisation In addition to more technical and policy oriented contributions the book also critically discusses existing narratives and pathways of the circular economy in the global North and South and how these differ or possibly even conflict with each other Finally the book critically examines under what conditions the circular economy will be able to reduce global inequalities and promote human development in the context of the Sustainable Development Goals Presenting a unique social sciences perspective on the circular economy discourse this book is relevant to students and scholars studying sustainability in economics business studies environmental politics and development studies *Bridging Asia-Europe Relations* Sameer Kumar,2025-10-08 This book provides a useful framework for addressing the various aspects of current Asia Europe relations including examinations of power transitions and geopolitics values and pragmatism climate change and sustainability technology and innovation and infrastructure and connectivity It discusses the current state of affairs the future of these relations and the challenges and opportunities that lie ahead for the two regions In modern times developments in infrastructure such as transportation and communication technologies have enhanced these regions connectivity Yet other geopolitical forces and power transitions are also influencing the stability of European Asian alliances sometimes in uncertain directions particularly as competition between China and the United States disrupts the global order The book also considers the impact of the ongoing Russian Ukrainian conflict in relation to Europe Asia diplomacy The book pivots on two fundamental questions How can the two regions bridge their differences and cooperate to meet common challenges And what opportunities and challenges arise for deeper political and economic integration in doing so A valuable resource for scholars policymakers and those interested in future of Asia Europe relations this book is a novel resource for researchers in political science and international relations sustainability studies sociocultural studies and all areas relating to Asian and European regionalism Post-consumer textile circularity in the Baltic countries: Current status and recommendations for the future Watson, David,Hvass, Kerli Kant,Moora, Harri,Martin, Kristiina,2020-09-10 Available online <http://pub.norden.org/temanord2020/526> By 2025 all EU member states will be obliged to separately collect used household textiles for reuse or recycling This report maps in detail the current status and extent of used textile collection and treatment in the Baltic States as well as the treatment and fate of the large quantities of used textiles imported from other parts of Europe for processing On this basis it makes recommendations for policy goals and actions for governments and industry stakeholders to stimulate textile ecosystems that can position the Baltic region at the forefront of European textile circularity **Beyond Green** Stephanie Smith,David and Alfred Smart Museum of Art,2005 Exploring the ways in which sustainable development is being used by an emerging group of artists who combine fresh aesthetic sensibilities with constructively critical approaches to the production dissemination and display of their art this book considers environmental issues in the context of art and design □□□□ □□□,2014 Up
