Transforming Brazil:

Transforming Brazil Mauricio Augusto Font, 2003 This book re-examines the relationship between development strategy and political regime in twentieth century Brazil. The first part of the study examines the beginning in the 1920s and 1930s of the centralized regime and state-centered development model later challenged in the 1980s taking into account the economic and political role of Sao Paulo relative to the federal government. The analysis provides a distinctive account of the regime ruling Brazil from the 1930s through the 1980s. The second part focuses on the process of economic and political change in the 1980s and 1990s paying particular attention to the Cardoso administration. **Transforming Brazil** Rafael R.

Ioris, 2014-05-09 In this book Rafael R Ioris critically revisits the postwar context in Brazil to reexamine traditional questions and notions pertaining to the nature of Latin America's political culture and institutions. It was in this period that the region lived some of its most intense and successful experiences of fast economic growth which was paradoxically marred by heightened ideological divisions, political disruptions, and the emergence of widespread authoritarian rule. Combining original sources of political, diplomatic, intellectual, cultural, and labor histories, Ioris provides a comprehensive history of the fruitful debates concerning national development in postwar Brazil, a time when the so-called country of the future faced one of its best moments for consolidating political democracy and economic prosperity. He argues that traditional views on political instability have been excessively grounded on an institutional focus which should be replaced by in-depth analysis of events on the ground. In so doing, he reveals that as national development meant very different things to multiple different social segments of the Brazilian society, no unified support could have been provided to the democratically elected political regime when things rapidly became socially and politically divisive early in the 1960s. Innovating in its multidimensional analytical scope and interdisciplinary focus, *Transforming Brazil* provides a rich political, cultural, and intellectual examination of a historical period characterized by rapid socio-economic changes amidst significant political instability and the heightened ideological polarization shaping the political scenario of Brazil and much of Latin America in the Cold War era.

Branding Brazil Leslie L. Marsh, 2021-05-14 Branding Brazil examines a panorama of contemporary cultural productions including film television photography and alternative media to explore the transformation of citizenship in Brazil from 2003 to 2014 A utopian impulse drove the reproduction of Brazilian cultural identity for local and global consumption cultural production sought social and economic profits especially greater inclusion of previously marginalized people and places Marsh asserts that three communicative strategies from branding promising progress cultivating buy in and resolving contradictions are the most salient and recurrent practices of nation branding during this historic period More recent political crises can be understood partly in terms of backlash against marked social and political changes introduced during the branding period Branding Brazil takes a multi faceted approach weaving media studies with politics and cinema studies to reveal that more than a marketing term or project emanating from the state branding was a cultural phenomenon
