Transforming Communities Steven J. L. Croft,2002 Suppose for a moment that it is the present way in which we are being church that is not working If that is the case then no amount of new thinking about ministry in isolation will be enough to take us forward It is the contention of this book that a new vision of what it means to be church is required Christians in every place are asking questions about the life of the church How do we re imagine what congregations can become How are we to develop new ways of being church which are sustainable and have the capacity for growth mission and renewal Steven Croft believes that part of the answer lies in developing small transforming communities as basic building blocks of Christian congregations In this important new book he develops a biblical and theological understanding of what the church is called to be a worked strategy for the future and practical guidelines for those called to help the church s transition to new models Transforming Communities draws on the best new thinking about the church from a variety of sources including academic theology cell church base ecclesial communities and the author s own experience of wrestling with these issues as an Anglican vicar and theological educator Intended for clergy ordinands and student ministers lay leaders concerned with pastoral re organisation small group leaders and church members it is suitable for all denominations and includes study guides to facilitate group work

Transforming Communities Joey Vrazel,2022-02-04 Minimum Specifications and Fundamental Shifts for Transforming Communities The amount of new and developing evidence and knowledge that has been generated across the Healthy Communities movement and other key community change efforts in the past few decades has been transformative Although this timeframe represents a period of major advances and notable efforts the progress has been significantly outpaced by social and environmental issues facing communities today issues related to health quality of life and economic stability As we usher in the next important phase of community change work we have the opportunity to step back and take stock of what we have learned to make important connections between key advances identify the commonalities across the wide landscape of community work and upgrade our frameworks to address complex change more effectively Sifting through the history and evidence Transforming Communities Lessons Learned from More Than 30 Years of Healthy Communities Efforts reveals that the next generation of this work requires more than an upgrade instead what is needed is a different operating system one that can address the larger landscape of community change work which includes

the interconnected domains of the economy education health and the environment Creating a different operating system requires changing how we see and think about this work and our communities how the work is structured how the parts are connected and interact and how community partners function together to achieve change and progress In **Transforming Communities** Joey Vrazel draws on the latest research and her professional experiences working at the local state and national levels to outline and describe the minimum specifications and fundamental shifts that are necessary to create a new operating system for communities and guide the next generation of progress
