been identified as important species of concern due to their potential health and environmental impacts This symposium
series book will describe the basic chemistry and physics determining the impacts of aerosol species and will highlight the
research results from the measurements that were taken following the collapse of the World Trade Center WTC on 9 11 01
The WTC tragedy led to the release of millions of pounds of debris aside from the structural steel part of which was widely
dissipated as aerosols and particulates in the debris cloud over lower Manhattan Additionally continuing fires under the
debris led to the release of fine combustion related aerosols for a considerable time period in this urban environment Held
during the week of the second anniversary of the WTC tragedy in NYC the symposium book will describe various aspects of
the event aerosol and gas exposures and the related impacts of these aerosols The book contributions will highlight efforts
work from atmospheric chemists meteorologists health workers and biologists for a timely compilation of what is known and
not known about the composition and transport of tropospheric aerosols in urban environs particularly those from the WTC
collapse Particular interest is in the acute and chronic environmental effects of these aerosols as they impact human health
Chapters included in the book will also address aerosol lifetimes aerosol transport and removal processes acute and chronic
health effects to fine aerosol and particulate exposures and the environmental impacts of aerosols **Concrete**
