The Future of Work and Technology Andreas Cebulla,2023-12-20 This book examines how global technological advances shape the way we work and allocate work today and how we might do so in the future exploring advances in robotics artificial intelligence green technology and implications for workforce skills and future welfare It uses Australia as a case study contrasting the country s experience to those elsewhere The book is a cross disciplinary collaboration that brings together the expertise of engineers data scientists economists and sociologists The reader is offered an overview of the current uses of advanced digital technologies and what it means for today s workforce society and economy The book also looks to the future Current uses of advanced technologies lag its already existing capability The contributions note potential future applications of technology and the economic social and workplace implications of technological change This book should be of interest to anyone studying and wishing to better understand what work might look like in the future and how we might prepare for likely changes

The Handbook for the Future of Work Julie MacLeavy, Frederick Harry Pitts,2024-12-26 The Handbook for the Future of Work offers a timely and critical analysis of the transformative forces shaping work and employment in the twenty first century Focusing on the past two decades the handbook explores how technological advancements automation and a shifting capitalist landscape have fundamentally reshaped work practices and labour relations Beyond simply outlining the challenges and opportunities of automation the handbook integrates these emerging realities with established discussions of work Importantly it moves beyond dominant technology centric narratives probing into broader questions about the nature of capitalism in a time of crisis and the contestation for alternative economic models With contributions from established and emerging authors based in institutions around the world the handbook offers a systematic overview of the developments that have sparked radical shifts in how we live and work and their multifaceted impacts upon social relations and identities practices and sectors politics and environments The handbook is unique in its exploration of the potential for economic transformations to reshape the centrality of work in our social and political imaginaries A useful resource for students and researchers the handbook serves as an essential guide to this new intellectual landscape

The Nordic future of work: Jon Erik Dølvik, Johan Røed Steen,2018-11-27 The Nordic future of work How will work and working life in the Nordic countries change in the future This is the question to be addressed in the project The Future of Work Opportunities and Challenges for the Nordic Models This initial report describes the main drivers and trends expected to shape the future of work It also reviews the main distinctions of the Nordic model and recent developments in Nordic working lives pointing towards the kind of challenges the future of work may pose to the Nordic models Too often debates about the future narrowly focus on changes in technology This report draws attention to the broader drivers and political institutional frameworks influencing working life developments aiming to spur debate about how the interaction of changes in demography climate globalization and digital technologies may influence Nordic working lives in the coming

decades The Future of Work Environments Werner Eichhorst,2025-07-15 Werner Eichhorst examines how work is paradoxical in its very nature both a necessity and a demanding burden and considers what the optimum future of working environments could look like

Gender, Technology, and the Future of Work Mariya Brussevich,Ms.Era Dabla-Norris,Christine Kamunge,Pooja Karnane,Salma Khalid,Ms.Kalpana Kochhar,2018-10-09 New technologies digitalization artificial intelligence and machine learning are changing the way work gets done at an unprecedented rate Helping people adapt to a fast changing world of work and ameliorating its deleterious impacts will be the defining challenge of our time What are the gender implications of this changing nature of work How vulnerable are women s jobs to risk of displacement by technology What policies are needed to ensure that technological change supports a closing and not a widening of gender gaps This SDN finds that women on average perform more routine tasks than men across all sectors and occupations tasks that are most prone to automation Given the current state of technology we estimate that 26 million female jobs in 30 countries 28 OECD member countries Cyprus and Singapore are at a high risk of being displaced by technology i e facing higher than 70 percent likelihood of being automated within the next two decades Female workers face a higher risk of automation compared to male workers 11 percent of the female workforce relative to 9 percent of the male workforce albeit with significant heterogeneity across sectors and countries Less well educated and older female workers aged 40 and above as well as those in low skill clerical service and sales positions are disproportionately exposed to automation Extrapolating our results we find that around 180 million female jobs are at high risk of being displaced globally Policies are needed to endow women with required skills close gender gaps in leadership positions bridge digital gender divide as ongoing digital transformation could confer greater flexibility in work benefiting women ease transitions for older and low skilled female workers
