## **World Views:**

World Views and the Problem of Synthesis Diederik Aerts, Hubert Van Belle, J. van der Veken, 2012-12-06 This book considers philosophy to be more than mere reflection Through philosophy humankind can give meaning to the world In part this book re evaluates the philosophy of Leo Apostel who dedicated his life to the investigation of the use of philosophy in everyday life But it is also a presentation of international research carried out along the lines of the worldviews project The contributions address not only professional philosophers but also students teachers academics and everyone interested in the relationship between philosophy and the world Worldviews and Cultures Nicole Note, R. Fernet-Betancourt, J. Estermann, Diederik AERTS, 2008-12-23 Globalization brings people and cultures together producing in addition to deep and rich encounters exclusion racism xenophobia and asymmetries The present book takes these issues implicitly as its starting point by thoroughly reflecting on them from a perspective of worldviews as one of many approaches More specifically it focuses on people s implicit and explicit interpretations and assumptions of the world of themselves and of others Often deeply rooted and hard to change they have an important function for without them we would continually need to question what we do and what we think In their absolutist form these assumptions may become a barrier for open mindedness and hence for deep intercultural understanding and exchange We need to find a balance between both stances Intercultural philosophy tries to fulfil this role on the one hand by comparing different cultures on a deep philosophical level and as a way to better understand each other s core assumptions and on the other hand by arguing for an intercultural philosophy grounded in specific cases The contributions of this book conceive of another possible world which does not condemn cultural and religious diversity as a detonator for Clashes of Civilizations but rather welcomes it as a source of inspiration for all and of respect for the different Religion and Worldviews L. Philip Barnes, 2022-09-21 Religion and Worldviews The Triumph of the Secular in Religious Education provides the first serious analysis and review of the Commission on Religious Education s proposed worldviews framework for the subject It argues that religious education has an important contribution to make to the aims of liberal education and examines whether the shift to a worldview framework is capable of overcoming current weaknesses and initiating a new positive direction for the future Chapters explore the role of worldviews in Religious Education covering key debates including Whether there is need for new legislation on RE The nature of professionalism and the role of experts The extent to which there is educational value in study of the personal worldviews of students The role of the religious voice in RE The relation of religions to religious worldviews The aims of RE The relationship between the state and religion Consideration of the nature of a worldview The personal reflections of a member of the Commission on its proposals The chapters provide all that is necessary to understand and to evaluate the current debate on the appropriateness of a worldviews approach to RE Bringing together leading names in the field this is essential reading for trainee and practising teachers of Religious Education RE advisers and schools leaders responsible for curriculum development
