Chao,2015-12-18 Software requirements specification SRS is in the software development process a result of the requirements and specifications phase That is a software requirements specification is for the analysts to find out what the customers indeed expect the software system to do for them When working on the software requirements specification we only specify what this software system is but never ask how this software system shall be manufactured A software system has been specified by software requirements specification SRS 1 0 hopefully to be an integrated whole embodied in its assembled components their interactions with each other and the environment Since software structure and software behavior are the two most prominent views of a software system integrating the software structure and software behavior apparently is the best way to achieve a truly integrated whole of a software system Because software requirements specification 1 0 does not specify the integration of software structure and software behavior very likely it will never be able to actually form an integrated whole of a software system Structure behavior coalescence SBC provides an elegant way to integrate the software structure and software behavior and hence achieves a truly integrated whole of a software system A truly integrated whole sets a path to achieve the desired software requirements specification SRS SBC facilitates an integrated whole Therefore we conclude that software requirements specification SRS 2 0 using the SBC approach which contains three fundamental diagrams a architecture hierarchy diagram b component operation diagram and c interaction flow diagram is highly adequate in specifying a software system **Validation of Pharmaceutical Processes** James P. Agalloco,Frederick J. Carleton,2007-09-25 Completely revised and updated to reflect the significant advances in pharmaceutical production and regulatory expectations this third edition of Validation of Pharmaceutical Processes examines and blueprints every step of the validation process needed to remain compliant and competitive The many chapters added to the prior compilation
