William Lescaze, Architect Lorraine Welling Lanmon, 1987 *A Selection from the Work Designed by William Lescaze, Architect, New York City* William Lescaze, 1942 [William Lescaze](#) Christian Hubert, Lindsay Stamm Shapiro, Joe and Emily Lowe Art Gallery (Syracuse University), 1982 [Europe Meets America](#) Gaia Caramellino, 2016-08-17 An analysis of the New York professional milieu between the Wall Street Crash of 1929 and the aftermath of WWII reveals an unexpected scenario in which diverse branches of technical culture and professional and institutional spheres often overlap and initiatives in the field of architecture are characterised by tensions between designers and technicians which pave the way for issues of architects autonomy responsibility and social roles in the New Deal From an initial portrayal of William Lescaze 1896 1969 as an unconventional figure straddling two continents this book challenges a long established interpretation that sees Lescaze exclusively as promoter of the International Style canons in the United States Moving beyond it this book focuses on the role that the Swiss architect played in defining the main features of New York social housing and in the evolution that marks the encounter between European modernity and an American federal scene still profoundly tied to local conventions From an initially difficult status as an migr to his involvement in decisional processes and bureaucratic organisations Lescaze s professional progress coincides with the gradual acceptance of European forms and models which little by little became part of the institutional language related to public housing which would remain prevalent in New York City until the end of WWII Drawing from yet unpublished archival sources pertaining to two fields housing and architecture which have traditionally been separate in American historiography this book sheds light on many crucial issues in a branch of architecture that is particularly relevant today [William Lescaze](#) William Lescaze, Christian Hubert, 1993 [Lescaze House, 211 East 48th Street, Borough of Manhattan](#) New York (N.Y.). culture of architecture as one facet of its broader modernist project Tracing the development and architectural integration of air conditioning from its origins in the late nineteenth century to the advent of the environmental movement in the early 1970s Joseph M Siry shows how the incorporation of mechanical systems into modernism's discourse of functionality profoundly shaped the work of some of the movement's leading architects such as Dankmar Adler Louis Sullivan Frank Lloyd Wright Ludwig Mies van der Rohe Gordon Bunshaft and Louis Kahn For them the modernist ideal of functionality was incompletely realized if it did not wholly assimilate heating cooling ventilating and artificial lighting Bridging the history of technology and the history of architecture Siry discusses air conditioning's technical and social history and provides case studies of buildings by the master architects who brought this technology into the conceptual and formal project of modernism A monumental work by a renowned expert in American modernist architecture this book asks us to see canonical modernist buildings through a mechanical engineering oriented lens It will be especially valuable to scholars and students of architecture modernism the history of technology and American history Frank Lloyd Wright's Fallingwater Catherine W Zipf, 2020-12-30 New Deal Book Award 2022 Honourable Mention Frank Lloyd Wright's Fallingwater explores the relationship between the economic tumult in the United States in the 1930s Frank Lloyd Wright and the construction of his most famous house Fallingwater The book reinterprets the history of this iconic building recognizing it as a Depression era monument that stands as a testimony to what an American architect could achieve with the right site client and circumstance even in desperate economic circumstances Using newly available resources author Catherine W Zipf examines Wright's work before and after Fallingwater to show how it was influenced by the economic climate public architectural projects of the Great Depression and America's changing relationship with Modernist style and technology Including over 50 black and white images this book will be of great interest to students historians and researchers of art architecture and Frank Lloyd Wright **William Lescaze**, 1984 *Design History* Dennis P.
