Thinking Ecologically Marian Chertow, 1997-01-01 Twenty five years ago the Cuyahoga River in Ohio was so contaminated that it caught fire air pollution in some cities was thick enough to taste and environmental laws focused on the obvious enemy large American factories with belching smokestacks and pipes gushing wastes Federal legislation has succeeded in providing cleaner air and water but we now confront a different set of environmental problems less visible and more subtle This important book offers thought provoking ideas on how America can respond to changing public health and ecological risks and create sound environmental policy for the future The innovative thinkers of the Next Generation Project of the Yale Center for Environmental Law and Policy experts from business government nongovernmental organizations and academia propose reforms that balance environmental efforts with other public needs and issues They call for new foundations for environmental law and policy

adoption of a more diverse set of policy tools and strategies economic incentives ecolabels and new connections between critical sectors agriculture energy transportation service providers and environmental policy Future progress must involve not only officials from the U S Environmental Protection Agency and state environmental protection departments say the authors but also decision makers as diverse as mayors farmers energy company executives and delivery route planners To be effective next generation policy making will view environmental challenges comprehensively connect academic theory with practical policy and bridge the gaps that have caused recent policy debates to break down in rancor This book begins the process of accomplishing these challenging goals

Thinking Ecologically Bruce Morito,2002 Arguments about the environment in the history of Western thought accompany a guide to developing an approach to environmental thought based on ecological attunement in this analysis of the fundamental concepts that ground environmental policy Sustainability sustainable development and conservation are three concepts that illustrate the relationship between humans and the environment A synthesis of Western Eastern and Aboriginal approaches to the environment offers a radically new way of thinking about how environmental ethics develop and evolve

The Ecological Thought Timothy Morton,2010-04-15 The author argues that all forms of life are interconnected and that no being construct or object can exist independently from the ecological entanglement nor does nature exist as an entity separate from the uglier or more synthetic elements of life Realizing this interconnectedness is what the author calls the ecological thought He investigates the philosophical political and aesthetic implications of this interconnectedness

Thinking Ecologically about the Global Political Economy Ryan Katz-Rosene,Matthew Paterson,2019-12-20 This book advances an ecologically grounded approach to International Political Economy IPE Katz Rosene and Paterson address a lacuna in the literature by exploring the question of how thinking ecologically transforms our understanding of what IPE is and should be The volume shows the ways in which socio ecological processes are integral to the themes treated by students and scholars of IPE trade finance production interstate competition globalisation inequalities and the governance of all these notably and further that taking the ecological dimensions of these processes seriously transforms our understanding of them Global capitalism has always been premised on the extraction transformation and movement of what have become known as natural resources The authors provide a synthesis of ecological arguments regarding IPE and weave them into an overall approach to be usable by others in the field This synthesis draws on basic ecological political ideas such as limits to growth and environmental justice ideas in ecological economics practices of ecological movements in the global economy as well as key ideas from other political economic traditions relevant for developing an ecological approach Providing a broad and critical introduction to international political economy from a distinctly ecological perspective this work will be a valuable resource for students and scholars alike

[Ecology of Spirituality. Transformative Solutions to Ecological Challenges in the 21st Century](#) Eric S. Mbuh,2022-12-08 Academic Paper from the year 2022 in the subject Theology Miscellaneous language

English abstract This paper presents a symbiotic relationship between humanity and the ecosystem The solution to this problem comes from the spiritual state of man The methodology used in the paper is a transformative approach to the ecological challenges faced in the 21st century The approach will use a theoretical lens to formulate interpretations from the ontological perspective that call for action agendas for reform and change The first part of the paper deals with what God has done in creation through what theologians call common grace The second part deals with man s duty and responsibility toward creation The third gives some implications of the destruction of the creation to the ecosystem animals and humans This will be seen through the carbon cycle and water cycle The findings of this paper are that humanity needs to rethink the growth in population without the growth and maintenance of the other areas of the ecosystem Therefore we have to learn from God and imitate him in His creation process

Ecological Thinking Lorraine Code, 2006-04-27 How could ecological thinking animate an epistemology capable of addressing feminist multicultural and other post colonial concerns Starting from an epistemological approach implicit in Rachel Carson s scientific practice Lorraine Code elaborates the creative restructuring resources of ecology for a theory of knowledge She critiques the instrumental rationality abstract individualism and exploitation of people and places that western epistemologies of mastery have legitimated to propose a politics of epistemic location sensitive to the interplay of particularity and diversity and focused on responsible epistemic practice Drawing on ecological theory and practice on naturalized epistemology and on feminist and post colonial theories Code analyzes extended examples from developmental psychology and from two natural institutions of knowledge production medicine and law These institutions lend themselves well to a reconfigured naturalism They are in practice empirically scientifically informed specifically situated and locally interpretive With human subjects as their objects of knowledge they invoke the responsibility requirements central to Code s larger project This book discusses a wide range of literature in philosophy social science and ethico political thought Highly innovative it will generate productive conversations in feminist theory and in the ethics and politics of knowledge more broadly conceived
