Thinking Tools For Kids:

Thinking Tools for Kids Barbara A. Cleary, Sally J. Duncan, 1999-01-01 Perhaps the first book of its kind written especially for young people Thinking Tools for Kids describes everyday challenges grade school kids encounter which can be solved by a variety of quality tools Each chapter starts out with a story that presents a problem students may come across the authors then explain which tools can be used to overcome these problems and give examples of how to apply these tools to other problems as well the many illustrations aid in the students understanding of the tools they are using while the helpful glossary aids the parents and teachers At the end of each chapter the authors give a home connection which encourages kids to take what they have learned and apply it to problems at home Thinking Tools for Young Readers and Writers Carol Booth Olson, Angie Balius, Emily McCourtney, Mary Widtmann, 2018 In her new book bestselling author and professional developer Carol Booth Olson and colleagues show teachers how to help young readers and writers construct meaning from and with texts This practical resource offers a rich array of research based teaching strategies activities and extended lessons focused on the thinking tools employed by experienced readers and writers It shows teachers how to draw on the natural connections between reading and writing and how cognitive strategies can be embedded into the teaching of narrative informational and argumentative texts Including artifacts and written work produced by students across the grade levels the authors connect the cognitive and affective domains for full student engagement This book seamlessly bridges the gap from research to everyday practice You get an extremely well organized set of overarching instructional principles that are right for our era and brought to life through well explained instructional guides and classroom activities From the Foreword by Judith Langer University at Albany SUNY I have always admired Carol Booth Olson s work with secondary students and teachers She now applies those essential principles and practices to elementary and middle school students Bravo P David Pearson professor emeritus University of California Berkeley **Children's Thinking** David F.
