Ryan,2012-06-07 In *Thinking without Thinking in the Victorian Novel* Vanessa L Ryan demonstrates how both the form and the experience of reading novels played an important role in ongoing debates about the nature of consciousness during the Victorian era Revolutionary developments in science during the mid and late nineteenth century including the discoveries and writings of Herbert Spencer William Carpenter and George Henry Lewes had a vital impact on fiction writers of the time Wilkie Collins George Eliot George Meredith and Henry James read contributions in what we now call cognitive science that asked what is the mind These Victorian fiction writers took a crucial step asking how we experience our minds how that experience relates to our behavior and questions of responsibility how we can gain control over our mental reflexes and
