## **Social Class And Health Status:**

**Social Class and Health Status** D. L. Crombie, 1984 This is not a summary of the black report The problems have been examined from the more localized and parochial view of working general practitioners Differences in health status between groups of individuals are just differences They become inequalities only if the differences result from disadvantage Seven statements can be made which transform the rather pessimistic assessment contained in the black report Notwithstanding the persistent relative disparity between the health status of social class 5 compared with social class 1 Improved health for all is one thing Equal opportunities for health for all is another To expect that equal health status can be achieved by all is unrealistic

Health and Health Care in Later Life Christina R. Victor,1991 One of the most potent images of later life is the general association between age and ill health The stereotype of later life is that it is characterized by universal and inevitable ill health The ageing of the population is therefore regarded as problematic because of the high consumption of health and social care by older people These two issues the health status of older people and the provision of health and social care are addressed in this volume The first section of the book presents an overview of the physical and mental health in later life It also addresses the health beliefs and behaviour of older people The second section of the book describes current patterns of health and social care utilization by older people and concludes with a discussion of how these may be affected by recent policy changes in Britain
