Kim,Jan Feijen,Teruo Okano,2012-12-06 First of all I would like to share the great pleasure of the successful five day symposium with every participant in the 5th Iketani Conference which was held in Kagoshima from April 1st Tuesday to 22 Saturday 1995 Outstanding speakers enthusiastically presented their up to the minute results Relatively little time was allotted for each presentation to ensure as much time as possible for intensive discussions on the particular topics that had just been presented I was delighted to see that the lectures were of high quality and the discussions were lively exciting and productive in a congenial atmosphere We also had 92 papers in the poster session in which young and relatively young scientists made every effort to present the novel results of their research in advanced biomaterials and drug delivery systems DDS I believe some of the research is most promising and will become noteworthy in the twenty first century It was a privilege for me to deliver a lecture at the special session of the symposium In my introductory remarks I pointed out five key terms in multifaceted biomaterials research materials design concept or methodology devices properties demanded and fundamentals I am confident that innovative progress in device manufacturing for end use e.g artificial organs vascular grafts and DDS can be brought about only through properly designed advanced materials that exhibit the desired functionality at the interface with any living body Optical and Quantum-structural Properties of Semiconductors Teiji Tsuruta,1993 **Applied Mechanics Reviews** ,1994 *Scientific Papers of the College of Arts and Sciences, the University of Tokyo* ,1991 Peptide Chemistry 1995 Symposium on Peptide Chemistry (33d : 1995 : Sapporo),1995 Aslib Book Guide ,1994 **Rikagaku kenkyûjo ihô.
