need of some one to guide them in solving the same It discusses the fundamental questions of ethics in a manner that cannot fail to attract the student and encourage him to reflect upon moral matters which is after all the greatest service that any book can hope to render him Many of our ethical treatises have a tendency to repel the average intelligent reader and to deaden instead of quickening his thought they make him feel that the subjects under discussion have absolutely no connection with life at least not with his life they often speak to him of things about which he knows nothing and cares less in language which he cannot understand This is a misfortune for if any science has a message to deliver to the people of our country and age it is certainly the science of conduct Professor Paulsen divides his work into four books The first traces the historical development of the conceptions of life and moral philosophy from the times of the Greeks down to the present and is one of the ablest and most fascinating surveys of the subject ever written About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

System of Ethics According to the Principles of the Doctrine of Science Johann Fichte, Fichte s text binds moral formation art and social order into a single project that aims at the elevation of humanity as a whole The moral educator stands at the center of communal life since The entirely proper and characteristic duty of the teacher of the people is that of good example and The faith of the congregation rests for the most part on his and if one takes the matter strictly is for the most part not much else than a faith in his faith Yet moral life is not sustained by doctrine alone for fine art works upon the whole person and makes the transcendental standpoint into the common one Hence Aesthetic sense is not virtue for the moral law demands self sufficiency according to concepts but the former comes of itself without all concepts Yet it is preparation for virtue it prepares the ground for it and when morality enters it finds half the work the liberation from the bonds of sensuousness already completed This formative power is

inseparable from a communal division of labor ordered toward freedom The higher are the spirit of the one great whole of humanity the lower the limbs of the same and the health of the body politic depends on the smooth reciprocity of understanding and execution The political core clarifies Fichte's Kantian allegiance while foreshadowing and contesting Hegelian themes In a Kantian vein right is unconditional and nonconsequential since Right is because it ought to be it is absolute it ought to be carried through even if no one thereby should fare well and the ruler is only the administrator of the common will under a norm that reason supplies At the same time Fichte extends Kant by weaving aesthetic cultivation and social pedagogy into the path from sensibility to autonomy giving art a direct role in moral readiness rather than only a reflective one With Hegel he shares an organic image of ethical life and estates as when the community is figured as spirit and limbs and he anticipates constitutional accountability for he governs as if he were responsible so that he is always ready to render account if it were demanded Yet against Hegel's later subordination of abstract right to objective spirit Fichte preserves the priority of the I and of natural right as an inviolable measure that even the historical state must answer to so that culture law and office remain instruments of freedom rather than its replacement This modern professional translation delivers scholarly depth with amplifying materials to place Fichte's philosophy in its social and intellectual context This critical reader's edition includes an extensive afterword tracing his personal relationship with both Hegel and Kant Fichte was also close with Kant to the point where Kant helped him publish his first philosophy book Fichte considered himself an heir of Kant's philosophy But over the decades Kant broke the relationship by stating that his system was completely indefensible and that Fichte had transformed critical philosophy into something Kant didn't recognize a form of idealism that eliminated the thing in itself entirely and made everything dependent on the activity of the ego Fichte and Hegel knew each other during their time at the University of Jena and Hegel was influenced by Fichte's idealist philosophy but he later developed sharp criticisms of Fichte's system Hegel eventually saw Fichte's philosophy as incomplete and overly subjective which he argued in works like the *Phenomenology of Spirit* Fichte influenced Schopenhauer's concept of the irrational Will Freud's Ego and Sartre's Existentialism In recent decades Fichte was revitalized by iek's praise for his subjective negativity as highlighting the Void of the Real This edition also contains a comprehensive timeline connects the major events of Fichte's life with world events an glossary of Critical Philosophical and Romantic Idealist terminology and a detailed index provides an authoritative guide to his complete writings to bring to life this critical late 18th century metaphysician
