*Teaching Communication* Anita L. Vangelisti,John A Daly,Gustav W. Friedrich,2013-11-05 The field of communication was founded in part because of a need to make people better communicators That meant teaching them how to communicate more effectively whether it be in public settings or in private Most of that teaching has happened within the classroom and many professionals have spent their lives instructing others on various aspects of communication Inside this second edition the editors have assembled a fully comprehensive and contemporary discussion of topics and issues concerning the teaching of communication The chapters contained herein contributed by key voices throughout the communication discipline address

conceptual as well as practical issues related to communication instruction. The contents of this new edition reflect the dramatic changes that have occurred in communication education since the publication of the first edition in 1990. This book focuses initially on the goals of communication education then delves into the preparation of specific communication courses. It includes assistance for instructors in organizing instructional content and discusses the use of instructional strategies and tools as well as offering ideas on evaluating the processes and products of instruction. The volume also covers unique teaching assignments that may be encountered from the basic course to continuing education and addresses 2 year college teaching directing forensic programs distance education and consulting. It concludes with important professional issues faced by both new and experienced communication instructors including ethics and political issues within classrooms and departments. This volume is a necessity for anyone starting out a career as a communication instructor. Veteran educators who know that learning to teach is a continual growth experience will find useful and invaluable information within the book's pages. Whatever background and level of experience all communication educators will find this new edition to be an essential resource for their work.

Basics in Medical Education Zubair Amin, Hoon Eng Khoo, 2003. Medical education the art and science behind medical teaching and learning has progressed remarkably. Teaching and learning have become more scientific and rigorous. Curricula are based on sound pedagogical principles and problem based and other forms of active and self directed learning have become the mainstream. We have progressed from the role of problem identifier to that of solution provider. This book provides a balanced overview of the OC whyOCO of medical education emphasizing the need for change and adaptation and the OC howOCO by demonstrating the way concepts and theories of medical education can be of immediate benefit to the medical teacher. In short this is a simple and non intimidating book for general medical teachers to enhance their understanding of medical education and to improve their teaching. Royalties from the sale of this book will benefit basic health care needs of children in developing countries.
