**Lacan and the Concept of the 'Real'** T. Eyers, 2012-08-07 This is the first book in English to explore in detail the genesis and consequences of Lacan's concept of the Real providing readers with an invaluable key to one of the most influential ideas of modern times

**The Concept of Mind** Gilbert Ryle, 1984 This now classic work challenges what Ryle calls philosophy's official theory the Cartesian myth of the separation of mind and matter Ryle's linguistic analysis remaps the conceptual geography of mind not so much solving traditional philosophical problems as dissolving them into the mere consequences of misguided language His plain language and essentially simple purpose put him in the tradition of Locke Berkeley Mill and Russell philosophers whose best work like Ryle's has become a part of our general literature

*Gregory of Nyssa and the Concept of Divine Persons* Lucian Turcescu, 2005-02-17 The concept of personhood is central to a wide range of contemporary issues ranging from reproductive rights to the death penalty and euthanasia We may think that the concept of person is a modern development In fact however this idea does not originate with our discovery of human rights consciousness and individuality In this study Lucian Turcescu shows that the fourth century theologian Gregory of Nyssa developed a very sophisticated concept of the person in the context of his attempts to clarify the paradox of the Trinity a single God comprising three distinct persons Turcescu offers the first in depth analysis of Gregory's writings about the divine persons He shows that Gregory understood personhood as characterized by uniqueness relationality and freedom He reasoned that the three persons of the Trinity have distinctive properties that make them individuals that is capable of being enumerated and circumscribed But this idea of individuation inherited from the neo Platonists falls short of expressing a clear notion of personal uniqueness By itself it would suggest that a person is merely a collection of properties Gregory's great contribution was to perceive the importance of relationality to personhood The three divine persons know and love each other are in communion with each other and freely act together in their common will This understanding argues Turcescu adds up to a concept of personal uniqueness much like our modern one Turcescu's work not only contributes to our knowledge of the history of Trinitarian theology but can be helpful to theologians who are dealing with issues in contemporary ethics

**The Idea and the Documents of Human Rights** Ioanna Kuçuradi, 2021-01-27 The most significant achievement of 20th century is probably the importance ascribed to the idea of human rights And perhaps the most significant endeavour of the world community in the second half of this century is its attempt to codify these ethical demands in declarations covenants and similar instruments expected to have universal validity Yet besides the unscrupulous violence torture and social injustice which continue to prevail in our world we also see gaining more and more ground tendencies to promote demands and practices which constitute unnoticed obstacles to the protection of human rights Is it not the so called herd immunity as a way to fight against a pandemic a violation of the right to life What are our shortcomings The present volume is an attempt to bring into focus one of these shortcomings the lack of clear knowledge of what human
