**The Nile** Sir Ernest Alfred Wallis Budge, 1902      **The Nile** Henri J. Dumont, 2009-05-06 What have we learnt about the Nile since the mid 1970s the moment when Julian Ryska decided that the time had come to publish a comprehensive volume about the biology and the geological and cultural history of that great river And what changes have meanwhile occurred in the basin The human population has more than doubled especially in Egypt but also in East Africa Locally industrial development has taken place and the Aswan High Dam was clearly not the last major infrastructure work that was carried out More dams have been built and some water diversions like the Toshka lakes have created new expanses of water in the middle of the Sahara desert What are the effects of all this on the ecology and economy of the Basin That is what the present book sets out to explore 33 years after the publication of *The Nile Biology of an Ancient River* Thirty seven authors have taken up the challenge and have written the new book They come from 13 different countries and 15 among them represent the largest Nilotic states Egypt Sudan Ethiopia Uganda and Kenya Julian Ryska died in 1984 and most of the authors of his book have now either disappeared or retired from research Only Jack Talling and Samir Ghabbour were still available to participate again

**Search for the Nile's Source** John Humphries, 2013-09-15 The source of the Nile had long eluded and tormented explorers and John Hanning Speke's discovery of Lake Victoria in 1858 elevated him to the pantheon of heroes of African exploration alongside Livingstone and Stanley But the part played by the Welsh mining engineer John Petherick in the discovery was ignored after he was branded a slave trader by Speke and the controversy that followed ended with Petherick ruined and Speke dead This first biography of Petherick places him at the centre of one of the great discoveries in African exploration and as the focus of a dispute that rocked the geographical establishment Was Petherick a rogue as portrayed by some or the victim of a conspiracy that destroyed his reputation and denied him a share of the credit for his part in one of the greatest feats in African exploration

The Nile and Its Masters: Past, Present, Future Jean Kerisel,2001-01-01 The Pharaohs were masters of the Nile they had a detailed understanding of the ways of the river Modern Egyptians see themselves as heirs to this tradition and as owners of the Nile waters In the 1960 s Egypt decided to protect its increasingly populated Nile valley from the ravages of annual flooding by building a dam A relatively small dam in the valley of Nubia in the region of Tushka would have enabled the excess floodwaters to safely be diverted towards the fossil valley of the pre Nile However it was decided to select a site near Aswan making it necessary to inundate more than 250km of river valley Over the years this strategy has been revealed to have been faulty and numerous irrigation schemes in upriver countries have progressively reduced the amount of water descending into Egypt The dire warning of the 14th century oracle appears to be prophetic the water of the river in my country will be stopped from reaching yours which I shall cause to die of thirst

**The Nile** David Cumming,2003 The Nile is the longest river in the world For much of its route through eastern Africa it travels through desert and farmers have been using its water for thousands of years The ancient Egyptians farmed the land beside the Nile and built great temples and pyramids on its banks European explorers searched for the river s source and the

troubled histories of Sudan and Ethiopia have been played out around it The Nile is home to a fascinating range of wildlife including hippos and crocodiles In the 1960s the Aswan High Dam was built across the Nile putting an end to the river s flooding but bringing other problems to the region Now the rapidly growing countries along the Nile compete for a share of its water Book jacket

**The Nile: Natural and Cultural Landscape in Egypt** Harco Willems,Jan-Michael Dahms,2017-03-15 Although Herodot s dictum that Egypt is a gift of the Nile is proverbial there has been only scant attention to the way the river impacted on ancient Egyptian society Egyptologists frequently focus on the textual and iconographic record whereas archaeologists and earth scientists approach the issue from the perspective of natural sciences The contributions in this volume bridge this gap by analyzing the river both as a natural and as a cultural phenomenon Adopting an approach of cultural ecology it addresses issues like ancient land use administration and taxation irrigation and religious concepts

**The Nile River** Tammy Gagne,2012-09-30 The longest river in the world the Nile River runs through 10 different African nations From the time of the ancient Egyptians to the present this waterway has been called the giver of life to the people who live along its banks They use it for farming fishing and even the production of electricity Legends and mysteries surround the river Men and at least one woman have devoted years of their lives to searching for its source Today several countries want to control it They may end up going to war over it A few individuals even dispute its title of the longest river in the world

**The Nile** Terje Tvedt,2021-07-15 The definitive history of the river Nile

**Lloyd's List Law Reports** ,1921 The Sphere ,1902 **The Nile** Judith Bunbury,Reim Rowe,2021-09-02 The ancient Egyptian kingdoms at their greatest extent stretched more than 2000 kilometres along the Nile and passed through diverse habitats In the north the Nile traversed the Mediterranean coast and the Delta while further south a thread of cultivation along the Nile Valley passed through the vast desert of the Sahara As global climate and landscapes changed and evolved the habitable parts of the kingdoms shifted Modern studies suggest that episodes of desertification and greening swept across Egypt over periods of 1000 years Rather than isolated events the changes in Egypt are presented in context often as responses to global occurrences characterised by a constant shift of events so although broadly historic this narrative follows a series of habitats as they change and evolve through time
