The Degrowth Economy. Strategic Path for Clothing Brands' Future and Empowerment Model for Fashion Consumers? ,2021-08-23 Master s Thesis from the year 2021 in the subject Business economics Offline Marketing and Online Marketing grade 1 AMD Akademie Mode Design GmbH Fresenius University language English abstract This thesis aims to develop degrowth oriented business models for fashion brands that could not only bring competitive advantage to these organizations but also drive the achievement of the Sustainable Development Goals defined by the United Nations in 2015 The outcome of this thesis provides a range of design options and strategies that can be implemented by fashion brands in the degrowth framework combined within a custom buildable business model matrix An empirical research conducted with both qualitative and quantitative data assessed the developed business model matrix based on nine existing fashion organizations The results showed the existence of three observable business model archetypes presenting strong similarities with the proposed model however always limited to a very reductive approach of the degrowth economy The degrowth economy has long been undervalued by businesses

considering prosperity without growth as an impossible match With the rising pressures imposed by climate change the new transformative challenges the fashion industry is facing and current shifts in consumers purchasing behaviors the degrowth economy debate appears as a relevant opportunity to initiate systemic change within the fashion industry This research highlights the need and relevance for the development of fashion business models using a more holistic approach of the degrowth economy now given possible thanks to the translation of degrowth concepts and ideas into implementable business strategies It suggests that fashion brands could get strong competitive advantages by following these recommendations and by acting as pioneers in a field that goes beyond the current understanding of sustainability in the fashion industry

The Circular Economy in Europe Zora Kovacic, Roger Strand, Thomas Völker, 2019-11-07 The Circular Economy in Europe presents an overview and a critical discussion on how circularity is conceived imagined and enacted in current EU policy making In 2013 the idea of a circular economy entered the stage of European policy making in the efforts to reconcile environmental and economic policy objectives In 2019 the European Commission declared in a press release that the Circular Economy Action Plan has been delivered The level of circularity in the European economy however has remained the same Bringing together perspectives from social sciences environmental economics and policy analysis The Circular Economy in Europe provides a critical analysis of policies and promises of the next panacea for growth and sustainability The authors provide a theoretical and empirical basis to discuss how contemporary societies conceive their need to re organise production and consumption and explores the messy assemblage of institutions actors waste streams biophysical flows policy objectives scientific disciplines values expectations promises and aspirations involved This book is essential reading for all those interested in understanding how ideas about the circular economy emerged historically how they gained traction and are used in policy processes and what the practical challenges in implementing this policy are

Circular Economy and Sustainable Value Creation through Eco-Innovation Srikanta Patnaik,Leon Miller,Francesco Vigliarolo,2025-05-29 Circular economy and sustainable value creation through eco innovation are interconnected concepts that revolve around creating a more sustainable and environmentally friendly approach to economic growth and business development In a world confronted by pressing environmental challenges the need for sustainable economic practices has never been more urgent The traditional linear economic model characterized by the take make dispose approach has led to resource depletion environmental degradation and social inequalities In response to these challenges the concepts of circular economy and eco innovation have emerged as powerful frameworks for reshaping our economic systems to prioritize sustainability The circular economy represents a paradigm shift from the linear economic model that has dominated for centuries Instead of viewing resources as finite and disposable the circular economy embraces the idea that resources can be kept in circulation for as long as possible thereby minimizing waste and environmental impact At the core of the circular economy is the efficient use of resources This entails reducing resource

consumption reusing products and materials and recycling to extend the life of resources Products are designed with durability and ease of repair in mind ensuring they have a longer lifespan and can be easily maintained Circular practices aim to restore natural systems and reduce harm to the environment whether through reforestation soil regeneration or sustainable agriculture
