# The 5x questions checklist for an effective hybrid workplace model

01

What do people want?

As mentioned above, a successful hybrid work strategy and hybrid workplace model can only work if it's designed to the people.

Before making any significant decisions or investments, it's important to understand the preferences, needs, and expectations of the people you want to work for. This includes understanding their work styles, their preferences for work location, and their expectations for work-life balance.

You want to build a hybrid work model that will meet the needs of everyone, and address the most common challenges faced by your team.

How do you think about how you should design a hybrid workplace? How do you think about how you should support the employees' needs and address the challenges in our hybrid workplace?
