Douglas,2004-08-19 This history of skyscrapers examines how these tall buildings affected the cityscape and the people who worked in lived in and visited them Much of the focus is rightly on the architects who had the vision to design and build America s skyscrapers but attention is also given to the steelworkers who built them the financiers who put up the money and the daredevils who attempt to conquer them in some inexplicable pursuit of fame The impact of the skyscraper on popular culture particularly film and literature is also explored      *Buildings and Building Management* Frank J. Zorn,1913      **The Architect and Building News** ,1926      *Drawing the Unbuildable* Nerma Cridge,2015-06-12 Architecture is conventionally seen as being synonymous with building In contrast this book introduces and defines a new category the unbuildable The unbuildable involves projects that are not just unbuilt but cannot be built This distinct form of architectural project has an important and often surprising role in architectural discourse working not in opposition to the buildable but frequently complementing it Using well known examples of early Soviet architecture Tatlin s Tower in particular Nerma Cridge demonstrates the

relevance of the unbuildable how it relates to current notions of seriality copying and reproduction and its implications for contemporary practice and discourse in the computational age At the same time it offers a fresh view of our preconceptions and expectations of early Soviet architecture and the Constructivist Movement The Architect ,1926 **Skyscraper** Elsa Herzfeld Naumburg, Clara Breakey Lambert, Lucy Sprague Mitchell, 1933 Photographs exposition and poems about the building of a skyscraper **Diplomatic and Consular Reports.
