State And Business In Modern Turkey:

State and Business in Modern Turkey Ayse Bugra, 1994-02-03 This book analyzes the factors that shape business activity in Republican Turkey and examines the presence of some of these factors in other societies with highly different cultures and histories Bugra's premise is that neither the institutional framework nor the behavioral regularities of a market economy emerge spontaneously following principles of a universally rational behavior Rather these reflect societal characteristics to be shaped by policy measures that ensure the smooth functioning of the market mechanism The author investigates the sociopolitical context of Turkish entrepreneurship by looking at the development of the private sector in the Republican period policy process under successive Republican governments socially defined features of the holding company the typical big business unit and the nature of business associations in Turkey Her analysis is relevant both to the study of business organization and to the study of structural change in late industrializing countries and former socialist societies where the shortcomings of standard economic approaches are clear

The Political Economies of Turkey and Greece Mustafa Kutlay, 2018-08-07 The economic policies of reactive states such as Turkey and Greece both of which have shown limited ability to implement institutional reforms in recent years have paved the way for deep crises The crises are devastating for both societies social fabric but they also open up the opportunity to introduce new economic regimes They do however not always invite changes in dominant paradigms Despite weak state capacity and deep economic crisis in both cases substantial reforms were initiated in Turkey whilst an opposite trend prevailed in Greece Drawing on field research this book develops a political economy framework that explains reform cycles and post crisis outcomes in reactive states

Development and Foreign Policy in Turkey Mustafa Kutlay, H. Emrah Karaoğuz, 2023-11-27 This book sketches an institutional political economy framework to discuss the interaction between development and foreign policy in the global South with reference to Turkey The authors argue that although the developmental state framework has commonly been employed to explore domestic economic development processes without analytically focusing on the foreign policy dimension developmental state institutions are highly relevant in the creation and pursuit of a development oriented foreign policy at a time of growing uncertainty marred by geopolitical and geoeconomic tensions The book develops a two level Regime Coherence Framework to account for the domestic and international dimensions of development oriented foreign policy The main argument posits that the development regime in Turkey and associated foreign policies lack coherence due to weak institutional complementarities between economic governance state business relations and financial statecraft at the domestic external nexus

[Industrial Policy in Turkey](#) William Hale, Mustafa Kutlay, Mina Toksoz, 2023-12-04 At a time when many advanced and emerging economies are adopting more active industrial policies this book provides an in depth historical empirical account of industrial policy in Turkey its rise retreat and return This study adopts a multidisciplinary approach and covers the role of the state in Turkey's initial industrialisation to the current period of restructuring and potential technological

upgrading of its manufacturing base The analysis traces how industrial policy has been shaped by state capacity the waves of reforms following economic crises the dearth of long term finance for industrialisation and more recently the need to address issues such as low tech industrial structure and pre mature de industrialisation *The Emergence of Modern Turkey* Bernard Lewis,1961 The subject of this book is the emergence of a new Turkey from the decline and collapse of the Ottoman Empire Although there have been many books on the Turkish revolution this is the first in which the development of modern Turkey is examined in detail over a period of two centuries and with extensive use of Turkish as well as Western sources In this new edition the author has made a number of corrections and additions and has revised the presentation of several topics to take account of new evidence and new research

Democracy and Capitalism in Turkey Devrim Adam Yavuz,2023-02-23 While a positive correlation between capitalism and democracy has existed in Western Europe and North America the example of late industrializing nations such as Turkey has demonstrated that the two need not always go hand in hand and sometimes the interests of business coincide more firmly with anti democratic forces This book explores the factors that compelled capitalists in Turkey to adopt a more pro democratic ideology by examining a leading Turkish business lobby T SIAD which has been pushing for democratic reform since the 1990s despite representing some of the largest corporation owners in Turkey and having supported the state s authoritarian tendencies in the past such as the military coup of 1980 Drawing on roughly 70 interviews with influential members of T SIAD and individuals close to them the book reveals that business leaders were willing to break away from the state due to the conflict between their evolving economic needs and power with a political elite and state that were unwilling to cater to their demands In so doing the book provides a rich account of business state relations in Turkey as well as providing a case study for the wider study of democracy and capitalism in developing nations
