Technocracy In The European Union:

Technocracy in the European Union Claudio M. Radaelli, 2017-09-29 One of the most common and strongest criticisms of the EU is that power is held by a select few who are unaccountable technocrats sitting in Brussels who without consultation formulate policies A fresh and innovative new series written by leading authorities providing students and researchers with a concise analysis of key topics relating to the state of the European Union and its future development Combining insights from the theoretical literature with brief institutional descriptions each book in the series focuses on the key questions Where does power lie What are the likely scenarios for development thereby enabling the reader to gain a better sense of the dynamic processes of politics at EU level

Democratic Decision-making in the EU Anne Elizabeth Stie, 2015-03-05 This book examines the democratic legitimacy of the European Union EU and evaluates the democratic credentials of the EU s main decision making procedure It finds that though there is potential for democratic decision making in the EU the actual process is dominated by technocrats and secret meetings The book assesses and discusses the conditions for democratic input in decision making with five empirical chapters each addressing the ordinary legislative procedure from different dimensions democratic deliberative forums inclusion openness power neutralising mechanisms and decision making capacity The analytical framework provides for an in depth assessment of the ordinary legislative procedure s potential democratic qualities and examines whether it fulfils democratic criteria how the procedure works in practice and whether it has the necessary democratic clout The author provides both a theoretical discussion and an empirical assessment of what role the principle of democracy could play in the EU Filling a gap in EU legislative studies and contributing to the debate on the European democratic deficit Democratic Decision making in the EU will be of interest to students and scholars of European Union politics legislative studies and deliberative democracy

A Responsive Technocracy? Christian Rauh, 2016-10-21 This book challenges the common image of the European Commission as an insulated technocracy immune to political pressures Based on an innovative combination of public opinion protest and media data it first demonstrates that European integration has become increasingly politicised since the 1990s Against this background the Commission is now much more concerned about the public appeal of its policies That however challenges and contradicts the well worn patterns of supranational regulation in Europe Rauh systematically compares 17 legislative drafting processes in consumer policy between 1999 and 2009 Based on first hand insider accounts of involved officials his analysis indicates that the Commission s policy choices indeed become more consumer friendly under higher levels of public awareness While this improves the democratic quality of European decision making the book also reveals an enhanced conflict potential within the Commission and beyond which threatens to undermine the efficiency of legislative decision making in the EU

Technocracy and the Law Alessandra Arcuri, Florin Coman-Kund, 2021-05-27. Technocratic law and governance is under fire. Not only populist movements have challenged experts, NGOs, public intellectuals, and some academics have also criticized the too close relation between experts and power. While the amount of power gained by experts may be contested, it is unlikely and arguably undesirable that experts will cease to play an influential role in contemporary regulatory regimes. This book focuses on whether and how experts involved in policymaking can and should be held accountable. The book is divided into four parts, combining theoretical analysis with a wide variety of case studies expounding the challenges of holding experts accountable in a multilevel setting. Part I offers new perspectives on accountability of experts, including a critical comparison between accountability and a virtue ethical framework for experts, a reconceptualization of accountability through the rule of law prism, and a discussion of different ways to operationalize expert accountability. Parts II-IV are organized around in-depth case studies that shed light on the accountability of experts in three high-profile areas for technocratic governance in a European and global context: economic and financial governance, environmental health and safety governance, and the governance of digitization and data protection. By offering fresh insights into the manifold aspects of technocratic decisionmaking and suggesting new avenues for rethinking expert accountability within multilevel governance, this book will be of great value not only to students and scholars in international and EU law, political science, public administration, science, and technology studies, but also to professionals working within EU institutions and international organizations.

Technocracy, Pluralism and the New Europe Ernst B. Haas, 1963. **Expertisation and Democracy in Europe** Magdalena Góra, Cathrine Holst, Marta Warat, 2017-11-27. Expertisation and Democracy in Europe provides a much-needed account of the role and re-organisation of expertise and expert knowledge in Europe and the European Union in a broad range of policy spheres, contributing to the debate triggered by the recent crises. It brings novel perspectives to debates on technocracy and our understanding of the relations between knowledge, experts, and democracy. The book explores and assesses new and old linkages between knowledge, expertise, and democracy, and expands and deepens the current debates by addressing questions such as: What is the role of expertise in Europe? How is knowledge of different kinds embedded in and decisive for democratic practice in contemporary democracies? How are we to assess recent transformations of the expert-citizens and government-civil society relationships from the perspective of democracy, and which paths are viable in the years to come? Finally, the book engages with and gives flesh to the notion of expertisation, not only as a broad political and societal diagnosis, but also as a multidimensional and deeply contested process that unfolds in concrete practices and institutional settings. This text will be of key interest to scholars and students of European studies, European and European Union politics, democracy, public policy, international relations.
