Technology And Contemporary Life:

Technology and the Character of Contemporary Life Albert Borgmann, 1984-01-01 Blending social analysis and philosophy Albert Borgmann maintains that technology creates a controlling pattern in our lives This pattern discernible even in such an inconspicuous action as switching on a stereo has global effects it sharply divides life into labor and leisure it sustains the industrial democracies and it fosters the view that the earth itself is a technological device He argues that technology has served us as well in conquering hunger and disease but that when we turn to it for richer experiences it leads instead to a life dominated by effortless and thoughtless consumption Borgmann does not reject technology but calls for public conversation about the nature of the good life He counsels us to make room in a technological age for matters of ultimate concern things and practices that engage us in their own right Technology and Contemporary Life P.T. Durbin, 2012-12-06 Nearly everyone agrees that life has changed in our technological society whether the contrast is with earlier stages in Western culture or with non Western cultures Modernization is just one of various terms that have been applied to the process by which we have arrived at the peculiar lifestyle typical of our age whatever the term for the process almost all analysts agree in finding technology to be one of its key ingredients This is the judgment of critics of all sorts anthropologists historians literary figures sociologists theologians Volume 4 in the Philosophy and Technology series brings the perspectives of philosophers to bear on the issue of characterizing contemporary life mainly in high technology societies Some of the philosophers look at the issue directly Others focus on work life or on the living arrangements that surround or condition or offer refuge from work life in technological society Still others reflect on particular technologies especially biotechnology and computer technology that are increasingly affecting both work and family life There is also a paper on the nature of thinking in technological praxis along with two papers on whether it is appropriate to export this sort of thinking to Third World countries and another paper on the issue of responsibility in technology which would have fit better in volume 3 of the series entitled Technology and Responsibility 1987 Finally volume 4 closes with a broad ranging bibliography that takes work and technology as its focus Distracted from Meaning Tiger C. Roholt, 2022-10-20 When our smartphones distract us much more is at stake than a momentary lapse of attention Our use of smartphones can interfere with the building blocks of meaningfulness and the actions that shape our self identity By analyzing social interactions and evolving experiences Roholt reveals the mechanisms of smartphone distraction that impact our meaningful projects and activities Roholt's conception of meaning in life draws from a disparate group of philosophers Susan Wolf John Dewey Hubert Dreyfus Martin Heidegger and Albert Borgmann Central to Roholt's argument are what Borgmann calls focal practices dinners with friends running a college seminar attending sporting events As a recurring example Roholt develops the classification of musical instruments as focal things contending that musical performance can be fruitfully understood as a focal practice Through this exploration of what generates meaning in life Roholt makes us rethink the place we allow smartphones to

occupy in the everyday But he remains cautiously optimistic This thoughtful needed interrogation of smartphones shows how we can establish a positive role for technologies within our lives

Technology and the Good Life? Eric Higgs, Andrew Light, David Strong, 2010-12-15 Can we use technology in the pursuit of a good life or are we doomed to having our lives organized and our priorities set by the demands of machines and systems How can philosophy help us to make technology a servant rather than a master

Technology and the Good Life uses a careful collective analysis of Albert Borgmann's controversial and influential ideas as a jumping off point from which to address questions such as these about the role and significance of technology in our lives Contributors both sympathetic and critical examine Borgmann's work especially his device paradigm apply his theories to new areas such as film agriculture design and ecological restoration and consider the place of his thought within philosophy and technology studies more generally Because this collection carefully investigates the issues at the heart of how we can take charge of life with technology it will be a landmark work not just for philosophers of technology but for students and scholars in the many disciplines concerned with science and technology studies
