**AW Chickering**

## **Technology And Social Inclusion:**

**Technology and Social Inclusion** Mark Warschauer, 2004-09-17 Much of the discussion about new technologies and social equality has focused on the oversimplified notion of a digital divide Technology and Social Inclusion moves beyond the limited view of haves and have nots to analyze the different forms of access to information and communication technologies Drawing on theory from political science economics sociology psychology communications education and linguistics the book examines the ways in which differing access to technology contributes to social and economic stratification or inclusion The book takes a global perspective presenting case studies from developed and developing countries including Brazil China Egypt India and the United States A central premise is that in today s society the ability to access adapt and create knowledge using information and communication technologies is critical to social inclusion This focus on social inclusion shifts the discussion of the digital divide from gaps to be overcome by providing equipment to social development challenges to be addressed through the effective integration of technology into communities institutions and societies What is most important is not so much the physical availability of computers and the Internet but rather people s ability to make use of those technologies to engage in meaningful social practices

### **Social Inclusion and Usability of ICT-enabled Services.**

Jyoti Choudrie, Sherah Kurnia, Panayiota Tsatsou, 2017-10-31 Social Inclusion and Usability of Innovative ICT enabled Services is a cutting edge research book written for researchers students academics technology experts activists and policy makers The book explores a wide range of issues concerning innovative ICT enabled digital services their usability and their consequent role in social inclusion It includes the impacts of the use of ICT enabled digital services on individuals organisations governments and society and offers a theoretically informed and empirically rich account of the socio technical management and policy aspects of social inclusion and innovative ICT enabled digital services This publication offers insights from the perspectives of Information Systems Media and Communications Management and Social Policy drawing on research from these disciplines to inform readers on diverse aspects of social inclusion and usability of innovative ICT enabled digital services The originality of this book lies in the combination of socio technical management and policy perspectives offered by the contributors and integrated by the editors as well as in the interdisciplinary and both theoretically framed and empirically rich features of the various chapters of the book While providing a timely account of existing evidence and debates in the field of social inclusion and technology usability this book will also offer some original insights into what practitioners experts and researchers are to expect in the near future to be the emerging issues and agendas concerning the role of technology usability in social inclusion and the emerging forms and attributes of the latter Through a collection of high quality peer reviewed papers Social Inclusion and Usability of Innovative ICT enabled Services will enhance knowledge of social inclusion and usability of innovative ICT enabled digital services and applications at a diverse level

*Social Inclusion: Societal and Organizational Implications for Information Systems* Eileen Trauth, Debra

Howcroft, Tom Butler, Brian Fitzgerald, Janice DeGross, 2006-09-13 Changes in society resulting from the pervasiveness of information technology have produced positive and negative intended and unintended consequences Key among them is the exclusion of individuals who lack access to technological resources from various societal processes and services The theme of this book social inclusion explores the many dimensions of this exclusion This issue has been the focus of much debate within the social sciences yet has largely been underresearched in the Information Systems field despite our concerns with the social and organizational aspects of technology To the extent that contemporary debates have identified access to information as a key component of poverty digital exclusion is seen as the problem Thus ICTs are portrayed as either exacerbating exclusion or are presented as the solution for greater inclusion This conference will provide us with the opportunity to build upon our strong tradition of studying technology design and use in organizations and expand our field of enquiry to consider the processes that engender social exclusion and the issues that derive from it This theme invites consideration of social and organizational constraints that result in the underrepresentation of certain groups and by implication certain issues Likewise it invites consideration of emerging technologies that have the potential to alter social political and economic relations Much is being written about the ubiquitous nature of ICTs to change society for example open source software has recently emerged as a concept with implications far beyond the technology domain This suggests that the role of ICTs in addressing social exclusion is far more complex than often thought For this reason it is timely to expand our focus and progress the study of IS beyond the organizational level of analysis so that we may consider wider concerns affecting all citizens This book contains the proceedings of the Working Conference on the societal and organizational implications for information systems of social inclusion This conference sponsored by the International Federation for Information Processing Working Group 8 2 was held in Limerick Ireland July 12 15 2006 Transfer, Diffusion and Adoption of Next-Generation Digital Technologies Sujeet K. Sharma, Yogesh K. Dwivedi, Bhimaraya Metri, Banita Lal, Amany Elbanna, 2023-12-12 This book constitutes the refereed proceedings of the IFIP WG 8 6 International Working Conference on Transfer and Diffusion of IT TDIT 2023 which took place in Nagpur India in December 2023 The 87 full papers and 23 short papers presented in these proceedings were carefully reviewed and selected from 209 submissions The papers are organized in the following topical sections Volume I Digital technologies artificial intelligence adoption digital platforms and applications digital technologies in e governance metaverse and marketing Volume II Emerging technologies adoption general IT adoption healthcare IT adoption Volume III Industry 4 0 transfer diffusion and adoption of next generation digital technologies diffusion and adoption of information technology Digital Literacy, Technology and Social Inclusion, 2015
