*The Huxleys* Alison Bashford, 2022-11-16 A New Yorker and Economist Best Book of the Year Two hundred years of modern science and culture told through one family history This momentous biography tells the story of the Huxleys the Victorian natural historian T H Huxley Darwin's Bulldog and his grandson the scientist conservationist and zoologist Julian Huxley Between them they communicated to the world the great modern story of the theory of evolution by natural selection In *The Huxleys* celebrated historian Alison Bashford writes seamlessly about these omnivorous intellects together almost as if they were a single man whose long vital life bookended the colossal shifts in world history from the age of sail to the Space Age and from colonial wars to world wars to the cold war The Huxleys specialty was evolution in all its forms at the grandest level of species deep time the Earth and at the most personal and intimate They illuminated the problems and wonders of the modern world and they fundamentally shaped how we see ourselves as individuals and as a species But perhaps their greatest subject was themselves Bashford's engaging brilliantly ambitious book interweaves the Huxleys momentous public achievements with their private triumphs and tragedies The result is the history of a family but also a history of humanity grappling with its place in nature This book shows how much we owe for better or worse to the unceasing curiosity self absorption and enthusiasm of a small strange group of men and women

*The Huxleys* Ronald William Clark, 1968 Nothing is as rare as genius unless it is a family which produces geniuses for three and even four generations Thomas Henry Aldous and Sir Julian are depicted with depth and detail in this family biography

*The Huxleys* Alison Bashford, 2022-11-16 This is a long overdue biography of the Huxleys the Victorian natural historian T H Huxley Darwin's Bulldog and his grandson the scientist conservationist and zoologist Julian Huxley Both T H and Julian suffered from depression thinking and writing about the condition and genetic inheritance in highly curious ways And between them they communicated to the world the great modern story of the theory of evolution by natural selection Because the grandson modeled himself so self consciously on the grandfather celebrated historian Alison Bashford writes seamlessly about these omnivorous intellects together almost as if they were one very long lived man whose vital dates bookended the colossal shifts in world history from the age of sail to the Space Age and from colonial wars to world wars to the cold war The myriad questions that the Huxleys grappled with make them the perfect dynasty companions for time travel over the age of evolution What is the nature of time and how old is the Earth itself What is the connection between human history and natural history How are humans animals and how are we not What is the deep past and the distant future of humankind Can and should we actively seek to improve future generations What might the planet look like 10 000 years hence This momentous biography traces the problems and wonders of the modern world that the Huxleys themselves raised postured and pondered over lives that spanned the age of evolution
