reprogram all others Creating the practices that make this process work is a key challenge for all in financial services that are worried about responding to the future When an institution can identify things that are outside its present practices and convert them production line style into products processes cultural changes or new markets it will never be outpaced by internal or external change again The institution becomes FutureProof This is a book about those practices in banks It explains using examples from institutions around the world what it takes to create an innovation culture that consistently introduces new things into undifferentiated markets and internal cultures It shows how banks can leverage the power of the new to establish unexpected revenue lines or make old ones grow And it provides advice on the social and political factors that either help or hinder the germination of the new in banks Moreover though this is a book about the science of innovation in a banking context Drawing from practices already highly developed in financial services managing portfolios of assets to mitigate risk it explains how practitioners can run their innovations groups like any other business line in the bank one that delivers a return on investment predictably and at high multiples of internal cost of capital For leaders Innovation and the Future Proof Bank provides the diagnostic tools to guide benchmarking and investment decisions for the innovation function And for innovation practitioners the book lays out everything needed to make sure that converting the new to business as usual is predictable measurable and profitable

The Entrepreneurial Humanities Alain-Philippe Durand,Christine Henseler,2023-06-07 With AI cryptocurrency and more in the news it seems that being an entrepreneur means being in IT but humanities graduates are launching new businesses every day turning a profit and having social impact This book explores how a humanities background can enable entrepreneurs to thrive Across all levels of education students are given the message that to change the world or make money the arts and humanities are not the subjects to study At the same time discussions of innovation and entrepreneurship highlight the importance of essential skills such as critical thinking storytelling cultural awareness and ethical decision making Here s the disconnect the subjects that help to develop these vital skills are derided at critical points in any aspiring entrepreneur s education This collection of perspectives from entrepreneurs in a range of fields and humanities educators illustrates what individuals and the wider world are missing when humanities are overlooked as a source of inspiration and success in business Featuring a foreword by Sensemaking author Christian Madsbjerg this is a thought provoking guide for aspiring entrepreneurs in all sectors and for educators a window on the practical value of the humanities in an ever more mechanized world _

The Lean Innovation Cycle Michael Parent,2022-04-11 Currently businesses are forced to be more innovative than ever before Organizations must be sensitive to global trends such as digitization globalization and automation and at the same time build resilience and flexibility to combat unexpected changes in customer demand The coronavirus pandemic is just the most recent and pronounced example of this new normal business necessity Amidst the disruption many businesses are caught not knowing how to proceed How ought one pursue or achieve innovation for the company Are there different innovation strategies Why

might a business leader choose one over the other The Lean Innovation Cycle addresses these concerns by introducing a new multidisciplinary framework for both thinking about and pursuing innovation By taking key concepts from the quality management practices of Lean and Six Sigma the framework augments these tools and disciplines by incorporating other problem solving and design techniques including Human Centered Design The result is a view of innovation that many business leaders will find fits nicely into their existing paradigm of strategy and operational discipline After the introduction of the framework the book turns to understanding the differences advantages and tradeoffs in pursuing Lean Innovation in lieu of traditional technologically driven innovation approaches To this end the book considers issues of sustainability organizational strategy and competitive advantage The result is a thought provoking dialogue that informs the reader about the key considerations of how best to pursue innovation within their business and the business environment as well as the circumstances that might make one innovation strategy more congruent to an organization s culture goals and objectives than the other
