The Obligation:

An Inquiry Into the Obligation of Religious Covenants Upon Posterity George Paxton, 1801 **An Essay on the Constitutional Prohibitions Against Legislation Impairing the Obligation of Contracts, and Against Retroactive and Ex Post Facto Laws** Henry Campbell Black, 1887 The Obligation Dilemma Ishtiyaque Haji, 2019 There are no moral obligations either it is determined in advance what we will do or it is not But any action not in our control cannot be obligatory for us Hence regardless of whether our actions are determined to occur nothing is obligatory This conclusion has important implications for conceptions of moral responsibility and free will **The Code of Federal Regulations of the United States of America**, 1998 The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government *On the Move to Meaningful Internet Systems: OTM 2014 Workshops* Robert Meersman, Herve Panetto, Alok Mishra, Rafael Valencia-García, Lucas Filipe Martins da Silva, Ioana Ciuciu, Fernando Ferri, Georg Weichhart, Thomas Moser, Michele Bezzi, Henry Chan, 2014-10-18 This volume constitutes the refereed proceedings of the following 9 international workshops OTM Academy OTM Industry Case Studies Program Cloud and Trusted Computing C TC Enterprise Integration Interoperability and Networking EI2N Industrial and Business Applications of Semantic Web Technologies INBAST Information Systems om Distributed Environment ISDE Methods Evaluation Tools and Applications for the Creation and Consumption of Structured Data for the e Society META4eS Mobile and Social Computing for collaborative interactions MSC and Ontology Content OnToContent 2014 These workshops were held as associated events at OTM 2014 the federated conferences On The Move Towards Meaningful Internet Systems and Ubiquitous Computing in Amantea Italy in October 2014 The 56 full papers presented together with 8 short papers 6 posters and 5 keynotes were carefully reviewed and selected from a total of 96 submissions The focus of the workshops were on the following subjects models for interoperable infrastructures applications privacy and access control reliability and performance cloud and configuration management interoperability in System of Systems distributed information systems applications architecture and process in distributed information system distributed information system development and operational environment ontology is use for eSociety knowledge management and applications for eSociety social networks and social services social and mobile intelligence and multimodal interaction and collaboration The Bankers', Insurance Managers', and Agents' Magazine, 1928 *The Duty to Obey the Law* William Atkins Edmundson, 1999 The question Why should I obey the law introduces a contemporary puzzle that is as old as philosophy itself The puzzle is especially troublesome if we think of cases in which breaking the law is not otherwise wrongful and in which the chances of getting caught are negligible Philosophers from Socrates to H L A Hart have struggled to give reasoned support to the idea that we do have a general moral duty to obey the law but more recently the greater number of learned voices has expressed doubt that there is any such duty at least as traditionally conceived The

thought that there is no such duty poses a challenge to our ordinary understanding of political authority and its legitimacy In what sense can political officials have a right to rule us if there is no duty to obey the laws they lay down Some thinkers concluding that a general duty to obey the law cannot be defended have gone so far as to embrace philosophical anarchism the view that the state is necessarily illegitimate Others argue that the duty to obey the law can be grounded on the idea of consent or on fairness or on other ideas such as community
