Tony Darwin, 1987 *The Science of Modern Virtue* Peter Lawler, Marc Guerra, 2013-11-01 The Science of Modern Virtue examines the influence that the philosopher Rene Descartes the political theorist John Locke and the biologist Charles Darwin have had on our modern understanding of human beings and human virtue Written by leading thinkers from a variety of fields the volume is a study of the complex relation between modern science and modern virtue between a kind of modern thought and a kind of modern action Offering more than a series of substantive introductions to Descartes Locke s and Darwin s accounts of who we are and the kind of virtue to which we can aspire the book invites readers to think about the ways in which the writings of these seminal thinkers shaped the democratic and technological world in which modern human beings live Thirteen scholars in this volume learnedly explore questions drawn from the diverse disciplines of political science philosophy theology biology and metaphysics Let the reader be warned The authors of these essays are anything but consensual in their analysis Considered together the chapters in this volume carry on a lively internal debate that mirrors theoretical modernity s ongoing discussion about the true nature of human beings and the science of virtue Some authors powerfully argue that Locke s and Darwin s thought is amenable to the claims made about human beings and human virtue by classical philosophers such as Aristotle and classical Christian theologians such as Thomas Aquinas Others make the opposite case drawing attention to the ways in which Descartes Locke and Darwin knowingly and dialectically depart from central teachings of both classical philosophy and classical Christian theology Bowker's Law Books and Serials in Print, 1995 *The Waiting Water* Alexander Sorenson, 2024-09-15 The Waiting Water addresses one of the most recurrent and troubling motifs in German Realist literature death by drowning Characters find themselves before bodies of water presented with the familiar realm above the surface and the unobservable uncanny domain beneath it With somber regularity they then disappear into the depths Alexander Sorenson explores the role that these hidden deaths in water play within a literary movement that set out precisely to reveal universal truths about human life The poetics of submergence he argues revolve around two concepts fundamental to Poetic Realism order and sacrifice Focusing on texts by Adalbert Stifter Gottfried Keller Marie von Ebner Eschenbach and Theodor Storm along with material from earlier and later epochs The Waiting Water shows that the pervasive symbolism of drowning scenes in German Realism which typically occur in zones of narrative invisibility on the social periphery reveals the extent to which realist narrative uses the natural environment to work through deeply
