The Classic Maya Collapse:

The Classic Maya Collapse T. Patrick Culbert, 1977 Of the many mysteries surrounding ancient Maya civilization none has attracted greater interest than its collapse in the eighth and ninth centuries AD Until recently speculations on the causes of the collapse have been more numerous than excavated sites in the area But the past twenty five years have produced many new findings In this book thirteen leading scholars use new data to revise the image of ancient Maya civilization and create a new model of its collapse a general model of sociopolitical collapse not limited to the cultural history of the Maya alone
Publisher's description

The Terminal Classic in the Maya Lowlands Arthur Andrew Demarest, Prudence M. Rice, Don S. Rice, 2005 The Terminal Classic in the Maya Lowlands revisits one of the great problems in Mayan archaeology the apparent collapse of Classic Maya civilization from roughly AD 830 to 950 During this period the Maya abandoned their power centers in the southern lowlands and rather abruptly ceased the distinctive cultural practices that marked their apogee in the Classic period Archaeological fieldwork during the past three decades however has uncovered enormous regional variability in the ways the Maya experienced the shift from Classic to Postclassic society revealing a period of cultural change more complex than acknowledged by traditional models Featuring an impressive roster of scholars The Terminal Classic presents the most recent data and interpretations pertaining to this perplexing period of cultural transformation in the Maya lowlands Although the research reveals clear interregional patterns the contributors resist a single overarching explanation Rather this volume's diverse and nuanced interpretations provide a new more properly grounded beginning for continued debate on the nature of lowland Terminal Classic Maya civilization

Rome and the Classic Maya Rebecca Storey, Glenn R Storey, 2017-01-20 This volume compares two of the most famous cases of civilizational collapse that of the Roman Empire and the Classic Maya world First examining the concept of collapse and how it has been utilized in the historical archaeological and anthropological study of past complex societies Storey and Storey draw on extensive archaeological evidence to consider the ultimate failure of the institutions infrastructure and material culture of both of these complex cultures Detailing the relevant economic political social and environmental factors behind these notable falls Rome and the Classic Maya contends that a phenomenon of slow collapse has repeatedly occurred in the course of human history complex civilizations are shown to eventually come to an end and give way to new cultures Through their analysis of these two ancient case studies the authors also present intriguing parallels to the modern world and offer potential lessons for the future

Fall of the Ancient Maya David Webster, 2002-06-04 Ancient Maya civilization thrived in the tropics of Central America for more than a thousand years and produced some of the world's finest architecture and art Then it mysteriously vanished leaving a landscape of ruins smothered by forests The Classic Maya collapse is one of the great puzzles of history ranking alongside the Fall of Rome as an enigma that has intrigued scholars for generations

Classic Maya Collapse Jeffrey Clark Wood, 1977 **A Systems Simulation of the Classic Maya Collapse** John W. G. Lowe, 1980 *The Petexbatun Regional Archaeological Project* Arthur Andrew Demarest, 2006 Then based on the project's findings Demarest presents interpretive reconstructions of the linked histories of the Pasión River kingdoms and correlates these interpretations with the variable evidence and culture histories of other regions of the Classic Maya lowlands He points out that only through linking such accurate regional culture histories can we begin to understand the eighth through tenth century changes in Classic Maya civilization The volume describes how the Petexbatun project addressed this challenge in its research design structure and large multicentered zone of study Building on the previous twenty years of Harvard research in adjacent zones the Vanderbilt projects succeeded in reconstructing events and processes throughout the Pasión River Valley the largest single inland trade route of the ancient Maya world Ritual, Violence, and the Fall of the Classic Maya Kings Gyles Iannone, Brett A. Houk, Sonja A. Schwake, 2018-11-05 This volume explores the links between the declining prosperity of the Late to Terminal Classic period and the erosion of kingly legitimacy Exploring issues such as the rise of inflation greater demand of tax and tribute deforestation due to over population and drought conditions the essayists examine what happens to a society when the king who should be appeasing the gods is seen as the problem **The Ancient Maya** Heather McKillop, 2004-08-19 Thanks to powerful innovations in archaeology and other types of historical research we now have a picture of everyday life in the Mayan empire that turns the long accepted conventional wisdom on its head Ranging from the end of the Ice Age to the flourishing of Mayan culture in the first millennium to the Spanish conquest in the 16th century *The Ancient Maya* takes a fresh look at a culture that has long held the public's imagination Originally thought to be peaceful and spiritual the Mayans are now also known to have been worldly bureaucratic and violent Debates and unanswered questions linger Mayan expert Heather McKillop shows our current understanding of the Maya explaining how interpretations of dirt archaeology hieroglyphic inscriptions and pictorial pottery are used to reconstruct the lives of royalty artisans priests and common folk She also describes the innovative focus on the interplay of the people with their environments that has helped further unravel the mystery of the Mayans rise and fall A Systems Simulation of the Classic Maya Collapse John Wesley Guinn Lowe, 1980 The Classic Maya Collapse Stanley Paul Guenter, 1999 **Healing** Sherrie M. Steiner, 2005-01-21 In *Healing* author Sherrie M Steiner promotes social change to grapple with the global environmental problems that threaten our collective future The book combines scientific and faith based motives to compel the reader to participate in social renewal In *Healing* Steiner mixes hard hitting realism with hopeful possibility in her assessment of the vulnerabilities of modern civilization Steiner addresses numerous socio political issues including economic growth energy policy and sustainability Ultimately however she says that it is the choices we make about who we become in the days ahead that will determine our healing Technically this book is about environmental sustainability but the subtext is altogether quite different This is a book about a future filled with hope The Ancient Maya of Mexico Geoffrey E Braswell, 2014-10-14 The

archaeological sites of Mexico's Yucatan peninsula are among the most visited ancient cities of the Americas. Archaeologists have recently made great advances in our understanding of the social and political milieu of the northern Maya lowlands. However, such advances have been under-represented in both scholarly and popular literature until now. *The Ancient Maya of Mexico* presents the results of new and important archaeological, epigraphic, and art-historical research in the Mexican states of Yucatan, Campeche, and Quintana Roo. Ranging across the Middle Preclassic to the Modern periods, the volume explores how new archaeological data has transformed our understanding of Maya history. *The Ancient Maya of Mexico* will be invaluable to students and scholars of archaeology and anthropology and all those interested in the society, rituals, and economic organization of the Maya region.

The Oxford Companion to Archaeology Neil Asher Silberman, 2012-11. The second edition of *The Oxford Companion to Archaeology* is a thoroughly up-to-date resource with new entries exploring the many advances in the field since the first edition published in 1996. In 700 entries, the second edition provides thorough coverage to historical archaeology, the development of archaeology as a field of study, and the way the discipline works to explain the past. In addition to these theoretical entries, other entries describe the major excavations, discoveries, and innovations from the discovery of the cave paintings at Lascaux to the deciphering of Egyptian hieroglyphics and the use of luminescence dating. Recent developments in methods and analytical techniques which have revolutionized the ways excavations are performed are also covered, as well as new areas within archaeology such as cultural tourism and major new sites which have expanded our understanding of prehistory and human developments through time. In addition to significant expansion, first edition entries have been thoroughly revised and updated to reflect the progress that has been made in the last decade and a half.

An Environmental History of the World Johnson, Donald Hughes, 2001. This book is a concise history of man's interaction with the environment from Ancient to Modern times. It is an introduction to environmental history which assumes little environmental or historical knowledge.

The Nature of the Classic Maya Collapse at Copán, Honduras T. Kam Manahan, 1995. *Classic Maya Collapse - Cities Abandoned!*, One of history's unsolved mysteries is why many Maya cities were abandoned in the 9th century AD, bringing an end to the Classic period. Examine theories that trace this collapse to war, drought, environmental damage, or volcanic eruption. Then hear Dr. Barnhart's solution to the puzzle.

Ancient Mesoamerica Arthur, Andrew Demarest, Nicholas P. Dunning, Antonia E. Foias, Héctor L. Escobedo, Juan Antonio Valdés, Takeshi Inomata, James Edward Brady, 1997. Presented here are the results of a long-term multidisciplinary project in the Maya lowlands which took place during the years 1989 through 1994. Arthur A. Demarest, the director of this Vanderbilt Petexbatun Regional Archaeological Project, describes the immense amount of new data which has resulted from this project, which will lead to a better understanding of the decline of Classic Maya civilization. The research was conducted in a region of Guatemala, the Petexbatun region of the southwestern Pasión River valley area of the Peten rainforest, where previous archaeological research and recent decipherments had indicated intense warfare toward the end of the Classic period.

Although the issue of warfare as a cause of collapse was the one most compelling question in the initial formulation of this project's research design Demarest brought in specialists to investigate all aspects of Petexbatun Maya society and culture and all possible causes of the cultural disintegration that took place there in the late eighth century
