**New SubUrbanisms** Judith De Jong,2013-09-11 Historically we see the city as the cramped crumbling core of development and culture and the suburb as the vast outlying wasteland convenient but vacant Contemporary urban design proves this wrong In *New SubUrbanisms* Judith De Jong explains the on going flattening of the American Metropolis as suburbs are becoming more like their central cities and cities more like their suburbs through significant changes in spatial and formal practice as well as demographic and cultural changes These revisionist practices are exemplified in the emergence of hybrid sub urban conditions such as parking practices the residential densification of suburbia hyper programmed public spaces and inner city big box retail among others Each of these hybridized conditions reflects to varying degrees the reciprocating influences of the urban and the suburban Each also offers opportunities for innovation in new formal and spatial practices that re configure conventional understandings of urban and suburban and in new ways of forming the evolving American metropolis Based on this new understanding De Jong argues for the development of new ways of building the city Aimed at students and practitioners of urban design and planning *New SubUrbanisms* attempts to re frame the contemporary metropolis in a way that will generate more instrumental engagement and ultimately better design

*Fighting Political Gridlock* David J. Toscano,2021-09-07 In this profoundly polarized era the nation has been transfixed on the politics of Washington and its seemingly impenetrable gridlock Many of the decisions that truly affect people s lives however are being made not on the federal level but in the states Faced with Washington s political standoff state governments are taking action on numerous vital issues often impacting citizens and their communities far more than the decision makers in D C Despite this few Americans really understand their state governments or the issues they address In *Fighting Political Gridlock* David Toscano reveals how the states are working around the impasse in Washington and how their work is increasingly shaping society Long a central figure in one of the most important legislative bodies in the nation the Virginia House of Delegates Toscano brings a unique expertise to this urgent and timely discussion Beginning with an analysis of state responses to COVID 19 including the processes and consequences of declaring states of emergency he goes on to detail how various states are attacking issues in different ways from education and voting to criminal justice and

climate change and provides a broad overview of how state actions affect our system of federalism Toscano concludes with a call to action and civic engagement including suggestions for how citizens and public officials can revitalize American democracy

**The Fracking Debate** Jonathan M. Fisk, 2017-08-07 The disputes around fracking and oil and gas policy follow a long tradition of complicated intergovernmental relationships Proponents argue that fracking supports new and well paying jobs revitalizes state and local economies and that it can help replace reliance on other fossil fuels Skeptics and opponents contend that oil and gas production via fracking contaminates air and water resources causes earthquakes and can ruin the character of many communities Examining the intergovernmental politics of the first oil and natural gas boom of the 21st century *The Fracking Debate* Second edition offers a holistic understanding of the politics that characterize oil and natural gas operations including why local governments are challenging their state s preemptive authority in order to initiate a larger conversation about improving intergovernmental relationships Author Jonathan Fisk presents a novel argument about the ways in which local state regional and national approaches to governance of shale gas development can work together to reduce conflict and forward the interests of the communities exposed to development asking important questions such as What state structures govern state local relations What state institutions impact and shape oil and gas production What is the policymaking context in the state What are the costs and benefits of hydraulic fracturing at the national state and local levels How are risks and rewards distributed within states What local policies have challenged the state and why would local communities challenge the state The result is a book that demonstrates that when stakeholders acknowledge their interdependencies and one another s expertise they create design and implement more responsive strategic and targeted public policies *The Fracking Debate* Second edition will be required reading for courses on oil and gas policy in the United States environmental politics and domestic energy politics as well as a vital reference for practitioners and policymakers working in these fields
